The Nature Of Necessity:

The Nature of Necessity Alvin Plantinga, 1978-02-01 This is a reissue of a book which is an exploration and defence of the notion of modality concerning the idea that objects have both essential and accidental properties. It is one of the first full length studies of the modalities to emerge from the debate to which Saul Kripke, David Lewis, Ruth Marcus and others have contributed. The argument is developed by means of the notion of possible worlds and ranges over key problems including the nature of essence, trans-world identity, negative existential propositions and the existence of unactual objects in other possible worlds. In the final chapters Professor Plantinga applies his logical theories to the clarification of two problems in the philosophy of religion: the Problem of Evil and the Ontological Argument.
