The Neural Control of Sweating G. H. Wang, 1964      The Neural Control of Sweating Ching-hsi Wang, 1964      G.H. Wang. *The Neural Control of Sweating* Ching-hsi Wang, 1964      Neural Control of Blood Pressure and Body Temperature During Heat Stress Zachary J. Schlader, Nisha Charkoudian, 2018-07-17 Environmental heat stress is associated with a marked decrease in orthostatic tolerance OT which is defined as the ability to stand or sit upright without symptoms of dizziness lightheadedness presyncope or fainting In most healthy humans the autonomic nervous system makes rapid and balanced adjustments to heart rate and peripheral blood flow such that most people are able to stand up successfully most of the time in most environments The goal of this book is to discuss various aspects of the sympathetic neural response to heat stress how the sympathetic nervous system coordinates the successful integrative physiological response to orthostasis and what happens when it encounters both challenges simultaneously We include overviews of mechanisms of thermoregulation and blood pressure regulation in humans with particular focus on control of cardiac output and neurovascular control mechanisms during heat stress We discuss the implications that these changes have for distribution of peripheral blood flow and in particular for blood flow to the cerebral circulation The added stressor of dehydration is also discussed as it so often goes hand in hand with heat stress We end with a brief presentation of countermeasures against the decreases in OT with heat stress      European Handbook of Neurological Management Richard A. C. Hughes, Michael Brainin, Nils Erik Gilhus, 2008-04-15 The European Handbook of Neurological Management published in collaboration with the European Federation of Neurological Societies EFNS is a unique book that brings together peer reviewed guidelines for the treatment and management of neurological disease For the first time neurologists can find advice on management aspects of most neurological disorders that is either evidence based or where the evidence is inadequate the consensus guidance of an international European panel of experts The guidelines fall naturally into sections that cover Investigation cerebrospinal fluid analysis imaging diagnostic antibodies and skin biopsy Major neurological diseases stroke migraine Parkinson s disease dystonia mild traumatic brain injury multiple sclerosis and Alzheimer s disease Neuromuscular diseases motor neuron disease inflammatory neuropathy muscular dystrophy and myasthenia gravis Infections HIV infection and encephalitis Neurological problems treatment of neuropathic pain acute relapses of multiple sclerosis and status epilepticus to name but a few Sleep disorders Narcolepsy other sleep disorders and restless legs syndrome Cognitive rehabilitation The European Handbook of Neurological Management is a book that any neurologist without regard to national boundaries will find a useful aid in the day to day management of neurological disease      *Hyperhidrosis: Pathophysiology, Therapeutic Advances, and Genetic Insights* Dr. Spineanu Eugenia, 2025-02-19 Explore the intricate world of hyperhidrosis in this comprehensive treatise delving into its underlying pathophysiology recent therapeutic advancements and groundbreaking genetic insights Discover the neurovascular mechanisms driving excessive sweating genetic predispositions influencing glandular dysfunction

and cutting edge treatments targeting these mechanisms This authoritative guide navigates through the complexities of sweat gland regulation offering insights into innovative gene therapies and precision medicine approaches Whether you re a medical professional researcher or patient seeking in depth understanding and effective management strategies

Hyperhidrosis Pathophysiology Therapeutic Advances and Genetic Insights provides a crucial resource at the forefront of hyperhidrosis research and treatment

**Electrodermal Activity in Psychological Research** William Prokasy,2012-12-02

Electrodermal Activity in Psychological Research summarizes the methodological problems involved in the application of electrodermal activity as a dependent variable to basic psychophysiological research The approach of this nine chapter book is generally from the molecular to the molar in sequence of chapters from basic to applied research and from the more elementary to the more complex independent variable manipulation This book covers first the terminology recording and measuring techniques electronic circuits and current theories of the physiological mechanisms of electrodermal responding The following chapters deal with the theories of attention and arousal the indices of electrodermal activity and their relationships to these theories the problems of measurement and control and the effects of various independent variable manipulation on simple and differential conditioning performance The discussions then shift to instrumental conditioning of electrodermal activity and the use of electrodermal measures in research on personality and pathological states such as with schizophrenics retardates depressives psychotherapy central nervous system damage anxiety and introversion extroversion This text further considers the presumed mechanisms underlying systematic desensitization and the relationship of these mechanisms to electrodermal activity A chapter explores the several widely divergent areas of social psychological research where electrodermal activity has been applied as a dependent variable including in attitude empathy small groups and social interactions The concluding chapter evaluates the scientific basis for the application of electrodermal measures to deception detection field

*Studies in Physiology* David R. Curtis,Archibald K. McIntyre,2012-12-06 This collection of papers is presented to Sir JOHN ECCLES by his former and present collaborators to commemorate the award of the 1963 Nobel Prize in Medicine which was shared with A L HODGKIN and A F HUXLEY Sir JOHN S interest in and influence on the study of physiology particularly that of the nervous system is reflected by the range of topics discussed and by the distribution of the various authors in laboratories throughout the world Those who have been privileged to work with him in Oxford Sydney Dunedin or Canberra have enjoyed a good discipline in scientific thought as well as in the use of neurophysiological techniques Basic knowledge is always transferable and the inspiration which comes from association with a great scientist is not confined to anyone field of physiology The contributors to this volume were requested to review briefly that aspect of physiology of current interest to them and it is hoped that the resulting papers will serve as an up to date review of many physiological problems The editors are greatly indebted to the publishers Springer Verlag particularly to Dr H GOTZE for his advice and interest It is also a pleasure to thank Mrs H WALSH for her unfailing assistance during the preparation of this
