Ingenuity Gap How Can We Solve The Problems Of The Future:

The Ingenuity Gap Thomas Homer-Dixon,2011-04-30 Is our world becoming too complex and too fast paced to manage The challenges facing human societies from international financial crises and global climate change to pandemics of tuberculosis and AIDS converge intertwine and often remain largely beyond our ken Most of us suspect that the experts don t really know what s going on and that as a species we have released forces that are neither managed nor manageable This is the ingenuity gap the term coined by Thomas Homer Dixon the critical gap between our need for practical and innovative ideas to solve complex problems and our actual supply of those ideas Homer Dixon shows us how in our complex world while poor countries are particularly vulnerable to ingenuity gaps our own rich countries are no longer immune When the gap widens political disintegration and violent upheaval can result reaching into our own economies and daily lives in subtle unforeseen ways

Global Issues and Change

Boyd Johnson (Ph. D.), John S Johnson (Ph. D.), 2004 Confronting New Realities Juma Volter Mwapachu, 2005 In 1986 Tanzania agreed with the IMF and the World Bank to pursue robust social and economic reforms in light of the serious decline in the performance of the economy with the objective of achieving sustainable economic growth At a political level a multi party system was introduced and the first multi party elections held since 1962 took place in 1995 and again in 2005 This book examines in considerable depth the political and economic changes that have taken place in this period of reform It highlights both the achievements and the challenges that remain particularly those brought about by new and dynamic phase of globalisation in areas such as trade and investment The author articulates perspectives on the democratisation and governance trajectories the country should pursue to attain a more prosperous economic status whilst sustaining the unity peace and diversity that have characterised the country since independence

An Illustrated Short History of Progress Ronald Wright, 2006 In these acclaimed CBC Massey Lectures Ronald Wright argues that each time history repeats itself the price goes up The twentieth century was a time of runaway growth in human population consumption and technology placing a colossal load on all natural systems He demonstrates how our modern predicament is as old as civilization a 10 000 year experiment we have participated in but seldom controlled Only by understanding the patterns of human triumph and disaster can we recognize the experiment's inherent dangers and shape its outcome Wright's provocative text evokes striking images across time and space starting with Paul Gauguin's painting *D O Venons Nous Que Sommes Nous O Allons Nous* Where do we come from What are we Where are we going three questions that perfectly summarize the focus of his lectures In this new edition illuminating illustrations and sidebars complement Wright's arguments and allow readers to witness further evidence supporting his cautionary tale pub desc *Long range planning* Strategic Planning Society, European Planning Federation, 2002 *World Affairs Journal*, 2000 **Digital Bridges** John Senyo C. Afele, 2003 Globalization and global equity are built on the premise of peace The causes of many divisions and tensions in human communities lie in the imagined

or real gain of financial or material assets of some elements of the community to be at the expense of others The global community however lacks clear definitions and methods of stability whether political economic or social Digital Bridges Developing Countries in the Knowledge Economy provides insight into the methods and theories behind the globalization of information technologies *Massive Change* Bruce Mau,Jennifer Leonard,Institute Without Boundaries,2004-10 Massive Change is a modern illustrated primer on the new inventions technologies and events that are affecting the human race worldwide The book is a part of a broader research project by Bruce Mau Design intended to provoke debate and discussion about the familiar objects and techniques that are transforming our lives In essays interviews and provocative imagery aimed at a broad audience Massive Change explores the changing force of design in the contemporary world and in doing so expands the definition of design to include the built environment transportation technologies revolutionary materials energy and information systems and living organisms The book is divided into 11 heavily illustrated sections covering major areas of change in contemporary society such as urbanism and architecture the military health and living and wealth and politics introductory essay extended captions and interviews with leading thinkers including engineers designers philosophers scientists architects artists and writers Concluding the book is a graphic timeline of significant inventions and world events from 10 000 B C to the present Massive Change is the umbrella name for wide ranging research project initiated by Bruce Mau Design and the Institute Without Boundaries a new post graduate design program headquartered at his studio The project will include not only this book but also a travelling exhibition public events an on line forum a documentary television project posters and a product line The overall aim of the project is to explore the changing force of design in the contemporary world The book focuses on the powerful newly designed technologies and systems and the failure of outmoded ones that increasingly influence our daily lives the debate about genetically modified foods the race to decode human the human genome the development and worldwide trafficking of sophisticated military weapons even the increasingly intrusive security systems at airports all are examples of massive changes that involve the field of design The book presents images and text that explore the impact of these subjects both the seemingly mundane as well as the mind boggling and microscopic As the text in *Massive Change* explains No longer associated simply with objects and appearances design is increasingly understood in a much wider sense as the human capacity to plan and produce desired outcomes The book is divided into 11 sections each focusing on a specific economy at work in the world today both the traditional such as manufacturing and the often invisible globalization and politics The pages combine images extended captions general essays and interviews in a clean simple design The imagery in *Massive Change* is irresistible and stands alone as a compelling reason to own this book beautiful For example a photo of a smoky blue blob as the caption explains is really Aerogel a material developed by NASA to collect fast moving space dust And a featherless naked chicken staring at us from the page is just that a new genetically engineered broiler that requires no plucking and yields more meat a boon to poultry producers yet a frightening harbinger of
