## The Brainbox:

### **Clinical Examination Skills for Healthcare Professionals** Mark Ranson, Hannah Abbott, Wendy

Braithwaite, 2014-01-02 Today an increasing number of healthcare professionals including nurses midwives and members of many allied professions have to conduct the vital first stage in a patient's journey taking a clinical history and conducting an effective physical examination. This book offers clear practical guidance on the fundamentals of clinical examination for any practitioner who wishes to understand their patient's specific needs and to plan appropriate care. Recognising that readers will come from a diverse range of clinical backgrounds and roles the opening chapter on consultation and the skills needed to take an accurate clinical history underpins the systems based approach. This combined with the use of case study examples allows healthcare professionals to focus on the principles of examining the system or systems that are most relevant to their specific area of practice. The book also includes a helpful glossary and list of abbreviations. The authors come from the same diverse range of professions for whom the book has been written and their wealth of knowledge and experience enables them to understand the challenges facing today's healthcare professionals. Contents include: Consultation and clinical history taking skills, Respiratory assessment, Cardiovascular assessment, Gastrointestinal assessment, Neurological assessment, Genitourinary assessment, Musculoskeletal assessment, Obstetric assessment, Mental health assessment, Perioperative assessment.

*Foreign Devil* Lee Bond, 2015-01-09 The future is broken Garth Nickels N Chalez doesn't know how he knows the future is broken but after being invited to enjoy a ten year stint in Trinity's officially unofficial crew of roughnecks and madmen known Universe wide as Special Services in lieu of paying for accidental damages to a Tynedale Fujihara mining facility there's no one better to make that assessment. And from his point of view it couldn't be more broken. But he's gonna find out even if it kills him because it's not just the future of the Universe that doesn't make sense it's his whole damn life being woken up from deep cryosleep in a spaceship that technically shouldn't exist and being told that you and the other fourteen people you were found with napped away the last thirty thousand years of Human expansion across the Universe and then being interred for an entire year so you can be grilled non stop by an increasingly angry Historical Adjutant who fell just shy of actual torture and then being politely told that since you were the only one to not be killed in a rather fantastic and wildly violent destructive bid for freedom you get to pay for the umpteen gazillion dollar facility can kind of make a guy feel like something's wrong dreadfully wrong with everything everywhere. The fact that he has highly specific amnesia about who he is what he and the other fourteen were doing in the ship why they were there how the ship was constructed well that only hammers home the whole everything is broken feeling. But Garth Nickels can sure as hell tell you anything you might ever want to know about the A Team Or Bugs Bunny Or Rob Zombie But nothing historically significant Well Garth did his bid in Special Services and made quite a name for himself Granted it's a name he'd prefer stay lost to the darkness across The Cordon where he did horrible awful things in the Trinity AI's name but it's a name nonetheless During that time the thirty

thousand year old Specter discovered that he not only has the same kind of powers and abilities as those who got killed during their escape his seem to grow in direct correlation to the threat He has become a man of strength and speed of violence and mayhem and he does not like it But he s free now from the haunting Specter he became free to hunt for something that he suspects might only be a dream somewhere out there in the depths of Trinityspace there is a ship the equal of the one he and his fourteen cryosleep buddies were discovered in The dreams tell him there are answers within and he ll do anything at all to find the answers to who he is and how the future is broken Garth s quest takes him to Latelystar the last of the Sovereign Systems thinking the task ahead would be easy How wrong can one man be As it turns out very Garth s exploits on the Latelian home world of Hospitalis set in motion a chain of events that will have him labeled Foreign Devil before he s done It ll take every ounce of self control patience and luck one Universe weary ex Specter can muster but will it be enough

**Chambers's Encyclopædia**, 1892    **Television**, Anthony Smith, Richard Paterson, 1998. From its earliest beginnings television was destined to become one of the great new forces at work in the twentieth century. This new edition, which includes six completely new chapters, greatly expands the original and unique historical coverage of this most influential cultural phenomenon. Written by a distinguished international team of specialists, the book describes the history of television from its technical conception in the nineteenth century right through to the bewildering multi media developments of the present. Alongside this historical account, chapters provide important discussion of the central debates affecting television worldwide from America, Canada and Britain to Europe, Scandinavia, Japan, China, South Asia, the Arab world, Australia, Africa and the Third World. All genres of programme making—news, sport, drama, comedy—are examined in the light of key questions: how viewing practices affect particular societies; how standards of taste and decency are arrived at; the influence of television on government power; the role of public service broadcasting and the relationship of television to terrorism and violence. A thought provoking Epilogue ponders the likely impact and influence of television in the coming years. This book is accessibly written and is a major exploration of the world's most dominant medium.
