Wallace, 2002-12-19 Graphics programmers aren't the only ones who need to be proficient with graphics. Web and applications programmers know that a dull web page can be quickly transformed into one that's interesting and lively with the use of well planned graphics. And fortunately you don't need the skills of a fulltime graphics programmer to use graphics effectively. From access counters and log report graphs to scientific plots and on the fly animated GIFs, graphics scripting is within the grasp of most web programmers. Using open source software like Perl you have the power to dynamically generate graphics based on user input and activity, easily manipulate graphics content and optimize graphics for compression and quality. Geared toward Perl users and webmasters, *Perl Graphics Programming* focuses on open source scripting programs that manipulate graphics files for use on the Web. The book demystifies the manipulation of graphics formats for newcomers to the Web with a practical resource like approach. With this book you'll learn to generate dynamic web graphics with charts, tables and buttons; automate graphics tasks, thumbnails and borders; create dynamic web documents, PDF, Postscript, produce rich Internet experiences with Flash and SVG. You'll begin with a tour of the most common web graphic file formats: PNG, JPEG, GIF, SWF, SVG, Postscript and PDF, then you'll explore the most powerful tools and Perl modules available for manipulating these graphics such as GD, PerlMagick and GIMP. Included in this part of the book is a thorough description of the Ming module for creating on the fly Flash files. Next a cookbook section includes practical, all purpose recipes: GIF animation, generating images within a dynamic application, communicating between SWF front end and Perl back end, XSLT transformations, compression and much more. Perl programmers naturally turn to Perl to tackle whatever challenge they have at hand and graphics programming is no exception. *Perl Graphics Programming* provides all the tools you need to begin programming and designing graphics for the Web immediately. This book will change how you think about generating and manipulating graphics for the Web.

Mathews, M. Gay Hubbard, 2010-08-01 Why Does Marriage Today Seem To Be Such a Far Cry From Paradise? Let's face it. Our culture's version of marriage is not as God designed it to be. With a lot more emphasis on individualism and consumerism today, married couples tend to lose sight of God's original purpose for marriage: a call for his people to take Jesus' message to the heart of everyday life. *Marriage Made in Eden* provides a radical alternative to today's view of marriage, giving a glimpse into the historical and cultural aspects that have shaped marriage in America. With this insightful analysis, you'll learn how marriage has come to be in the state we now find it and about God's model and purpose for a sacred Christian union. Contemporary Rhetorical Theory John Louis Lucaites, Celeste Michelle Condit, Sally Caudill, 1999-01-01 This indispensable text brings together important essays on the themes, issues, and controversies that have shaped the development of rhetorical theory since the late 1960s.
