## **The Marginal Self:**

*The Marginal Self* René J. Muller, 1987    **Theories of the Stranger** Vince Marotta, 2016-09-13 In our global multicultural world how we understand and relate to those who are different from us has become central to the politics of immigration in western societies Who we are and how we perceive ourselves is closely associated with those who are different and strange This book explores the pivotal role played by the stranger in social theory examining the different conceptualisations of the stranger found in the social sciences and shedding light on the ways in which these discourses can contribute to an analysis of cross cultural interaction and cultural hybridity Engaging with the work of Simmel Park and Bauman and arguing for the need for greater theoretical clarity Theories of the Stranger connects conceptual questions with debates surrounding identity politics multiculturalism online ethnicities and cross cultural dialogue As such this rigorous conceptual re examination of the stranger will appeal to scholars across the social sciences with interests in social theory and the theoretical foundations of discourses relating to migration cosmopolitanism globalisation and multiculturalism

*The Anthem Companion to Robert Park* Peter Kivisto, 2017-06 The Anthem Companion to Robert Park comes to terms with Robert Park's legacy This companion focuses largely on the work rather than the man a major figure in American sociology during the first half of the past century and encourages readers to consider the virtue of rethinking and rereading the much maligned and frequently misunderstood Park Despite the fact that he wrote with exemplary clarity Park's work has often been ignored by contemporary sociologists The contributions in this companion embrace no singular response to Park but rather present a broad range of responses generally appreciative but also critical

## **Determinants of Self-employment**

Gerrit de Wit, 2012-12-06 This book is the result of five years of research that I carried out as a research fellow at the Faculty of Economics and Econometrics of the University of Amsterdam The project was initiated in 1986 by Frans van Winden and Roy Thurik Frans van Winden became interested in self employment through his work concerning government behavior In the models that he employs the government is influenced by various social groups the political strength of which is related to their size As one of these is the group of self employed individuals he became interested in determinants of the size of this group Roy Thurik was professionally interested in the subject because of his work at the Research Institute for Small and Medium sized Business in the Netherlands EIM an institute that does much research in this area Together they wrote a proposal for a research project for which they received funding from the Dutch Ministry of Economic Affairs These funds were supplemented by the University of Amsterdam and at a later stage by the Organization for the Advancement of Research in the Economic Discipline ECOZOEK that is part of the Netherlands Organization for Scientific Research NWO This support is gratefully acknowledged The commercial edition of this book was partly financed by the Centre for Energy Conservation and Environmental Technology CE the Center for Research in Experimental Economics and Political Decisionmaking CREED and the University of Amsterdam

**Beyond Marginality** René J. Muller, 2024-09-03 Identification

of the phenomenon of marginality in The Marginal Self the failure to become one's authentic best self by refusing to actualize this potential that is inherent in us all turns on recognizing that freedom and its misuse underlie most human behavior normal and pathological Jean Paul Sartre insisted that people don't just have freedom they are freedom Most philosophical anthropologies including Freudian psychoanalysis and the current medical model of mental illness propagated by the American Psychiatric Association and typified in the Diagnostic and Statistical Manual of Mental Disorders DSM do not acknowledge this essential reality Beyond Marginality came out first eleven years after the initial 1987 publication of The Marginal Self The author in the meantime had become acquainted with the Zen philosophy of D T Suzuki of whom Martin Heidegger said that if he understood this man's work correctly Suzuki had accomplished what Heidegger had been trying to do all his life What did Heidegger see in Suzuki's anthropology That the Cartesian duality ultimately the dissociation of our inner lives from the world around us and from one another was a distortion created by us that we could overcome through Zen's actionable intuition of human wholeness How this overcoming might be brought about is the theme of Beyond Marginality starting with Suzuki's intuition and embracing the work of many allied thinkers Equally compelling are vivid testimonials from those who had stumbled into marginality some eventually recognizing the negative consequences of their misused freedom then freely willing themselves out of their marginal states Helping people move beyond marginality and its attendant psychic pathology parallels the present enthusiasm of the mental health community for a positive psychology Gestalt psychologist Kurt Lewin left us with the counter Cartesian Zen like insight that nothing is so practical as a good theory

**Self-representational Approaches to Consciousness** Uriah Kriegel,Kenneth Williford,2006 Leading theorists examine the self representational theory of consciousness as an alternative to the two dominant reductive theories of consciousness the representational theory of consciousness and the higher order monitoring theory In this pioneering collection of essays leading theorists examine the self representational theory of consciousness which holds that consciousness always involves some form of self awareness The self representational theory of consciousness stands as an alternative to the two dominant reductive theories of consciousness the representational theory of consciousness RTC and the higher order monitoring HOM theory combining elements of both RTC and HOM theory in a novel fashion that may avoid the fundamental deficiencies of each Although self

representationalist views have been common throughout the history of both Western and Eastern philosophy they have been largely neglected in the recent literature on consciousness This book approaches the self representational theory from a range of perspectives with contributions from scholars in analytic philosophy phenomenology and history of philosophy as well as two longer essays by Antonio Damasio and David Rudrauf and Douglas Hofstadter The book opens with six essays that argue broadly in favor of self representationalist views which are followed by five that argue broadly against them Contributors next consider connections to such philosophical issues as the nature of propositional attitudes knowledge attention and indexical reference Finally Damasio and Rudrauf link consciousness as lived with consciousness as described in neurobiological terms and Hofstadter compares consciousness to the strange loop of mathematical self reference brought to light by Gödel's incompleteness theorems Contributors Andrew Brook Peter Carruthers Antonio Damasio John J.
