Smith,2010-09-14 Analyzing Social Media Networks with NodeXL offers backgrounds in information studies computer science and sociology This book is divided into three parts analyzing social media NodeXL tutorial and social media network analysis case studies Part I provides background in the history and concepts of social media and social networks Also included here is social network analysis which flows from measuring to mapping and modeling collections of connections The next part focuses on the detailed operation of the free and open source NodeXL extension of Microsoft Excel which is used in all exercises throughout this book In the final part each chapter presents one form of social media such as e mail Twitter Facebook Flickr and Youtube In addition there are descriptions of each system the nature of networks when people interact and types of analysis for identifying people documents groups and events Walks you through NodeXL while explaining the theory and development behind each step providing takeaways that can apply to any SNA Demonstrates how visual analytics research can be applied to SNA tools for the mass market Includes case studies from researchers who use NodeXL on popular networks like email Facebook Twitter and wikis Download companion materials and resources at <https://nodexl.codeplex.com/documentation>

Integrating Human Factors Methods and Systems Thinking for Transport Analysis and Design Gemma J. M. Read,Vanessa Beanland,Michael G. Lenné,Neville A. Stanton,Paul M. Salmon,2017-07-26 Governments and road safety agencies around the world have either introduced or are considering safe system strategies a long overdue acknowledgement that different elements of the road system contribute to road safety outcomes Human factors approaches have a leading role here in both conceptualising the road system as a complex sociotechnical system and in providing practical approaches to support true systems based countermeasures This book illustrates the potential for integrating contemporary systems based human factors methods with modern day driving assessment methods such as vehicle instrumentation and driving simulation to understand and enhance performance in modern day road transport systems The book outlines why a fundamental paradigm shift is needed in the way these systems are designed and operated and illustrates how a wide range of accepted human factors approaches can be applied successfully to road transport to revolutionise the countermeasure design process The practical illustrations of these human factors methods are applied to a long standing road and rail safety issue rail level crossings where the road and rail systems intersect The final chapter of the book highlights the utility of the human factors approach to reducing road trauma and discusses future applications of the approach **Life by Design** Marlon Buchanan,2025-07-20 Imagine a life where you spend less time managing tasks and more time pursuing your passions In Life By Design you ll discover how to leverage technology to automate the everyday tasks that consume your time so you can focus on what truly matters to you Whether you want to spend more time with family improve your health or get ahead at work this book provides the tools to help you streamline your life Inside you ll
