Custom, Improvement and the Landscape in Early Modern Britain Richard W. Hoyle, 2017-03-02 A great deal has been written about the acceleration of English agriculture in the early modern period In the late middle ages it was hard to see that English agriculture was so very different from that of the continent but by 1750 levels of agricultural productivity in Britain were well ahead of those general in northern Europe The country had become much more urban and the proportion of the population engaged in agriculture had fallen Customary modes of behaviour whilst often bitterly defended had largely been swept away Contemporaries were quite clear that a process of improvement had taken place which had seen agriculture reshaped and made much more productive Exactly what that process was has remained surprisingly obscure This volume addresses the fundamental notion of improvement in the development of the British landscape from the sixteenth to the nineteenth century Contributors present a variety of cases of how improvement custom and resistance impacted on the local landscape which includes manorial estates enclosures fens forests and urban commons Disputes between tenants and landlords and between neighbouring landlords over improvement meant that new economic and social identities were forged in the battle between innovation and tradition The volume also includes an analysis of the role of women as agricultural improvers and a case study of what can happen when radical improvement failed The volume will be essential reading for scholars of landscape studies rural and agrarian history but will also provide a useful context for anybody studying the historical legacy of mankind's exploitation of the environment and its social economic legal and political consequences

The Landscape Album; Or, Great Britain Illustrated ... Thomas Moule, 1834

The Landscape of Anglo-Saxon England Della Hooke, 1998 This book concerns the landscape that surrounded early medieval man often described as he saw and experienced it The Anglo Saxon period was one of considerable change in settlement and land use patterns but the landscape regions that emerge documented for the first time in history are still familiar to us today The image conjured up and for the present it can hardly be any more than an image is tentative and incomplete for many more threads have been embroidered upon it in the thousand succeeding years but the early patterns often guided the latter and occasionally still show through This book examines the Anglo Saxon's view of his natural surroundings and how he utilized the resources available the cropland woodland and marginal land of pasture and fen and how this is reflected in administrative patterns how it influenced settlement communications and trade and moreover influenced the landscape patterns of successive ages

British Art and the East India Company Geoff Quilley, 2020 Examines the role of the East India Company in the production and development of British art demonstrating how art and related forms of culture were closely tied to commerce

and the rise of the commercial state This book examines the role of the East India Company in the production and development of British art during the eighteenth and early nineteenth centuries when a new school of British art was in its formative stages with the foundation of exhibiting societies and the Royal Academy in 1768 It focuses on the Company's patronage promotion and uses of art both in Britain and in India and the Far East and how the Company and its trade with the East were represented visually through maritime imagery landscape genre painting and print making It also considers how for artists such as William Hodges and Arthur William Devis the East India Company and its provision of a wealthy market in British India provided opportunities for career advancement through alignment with Company commercial principles In this light the book's main concern is to address the conflicted and ambiguous nature of art produced in the service of a corporation that was the scandal of empire for most of its existence and how this has shaped and distorted our understanding of the history of British art in relation to the concomitant rise of Britain as a self consciously commercial and maritime nation whose prosperity relied upon global expansion increasing colonialism and the development of mercantile organisations

The Early Anglo-Saxon Kingdoms of Southern Britain AD 450-650

Sue Harrington, Martin Welch, 2014-07-31 The Tribal Hidage attributed to the 7th century records the named groups and polities of early Anglo Saxon England and the taxation tribute due from their lands and surpluses Whilst providing some indication of relative wealth and its distribution rather little can be deduced from the Hidage concerning the underlying economic and social realities of the communities documented Sue Harrington and the late Martin Welch have adopted a new approach to these issues based on archaeological information from 12 000 burials and 28 000 objects of the period AD 450 650 The nature distribution and spatial relationships of settlement and burial evidence are examined over time against a background of the productive capabilities of the environment in which they are set the availability of raw materials evidence for metalworking and other industrial craft activities and communication and trade routes This has enabled the identification of central areas of wealth that influenced places around them Key within this period was the influence of the Franks who may have driven economic exploitation by building on the pre existing Roman infrastructure of the south east Frankish material culture was as widespread as that of the Kentish people whose wealth is evident in many well furnished graves but more nuanced approaches to wealth distribution are apparent further to the West perhaps due to ongoing interaction with communities who maintained an essentially Romano British way of life
