It includes restriction relaxation, local ratio approximation schemes, randomization, tabu search, evolutionary computation, local search, neural networks and other metaheuristics. It also explores multi objective optimization, reoptimization, sensitivity analysis and stability. Traditional applications covered include bin packing, multi dimensional packing, Steiner trees, traveling salesperson scheduling and related problems. Volume 2 focuses on the contemporary and emerging applications of methodologies to problems in combinatorial optimization, computational geometry and graphs problems as well as in large scale and emerging application areas. It includes approximation algorithms and heuristics for clustering, networks, sensor and wireless communication, bioinformatics, search streams, virtual communities and more.
