

**Objectivity: An Introduction**

Students demonstrate an understanding of engineering problem-solving techniques simply from the knowledge already provided by learning the principles of thermodynamics. The key to understanding the introduction of design is to present the primary responsibility of an engineer. The typical engineering culture is to design, and design is the process of the synthesis that creates a new part, solution, or machine that provides a solution to a problem or fulfills a need. The student is required to make a new design, and it is important that it be a new design. Students are required to then demonstrate what is possible, design an interdisciplinary engineering project and demonstrate it.
