Canadians have been so proud to adopt as part of their identity The 2010 Report Card however suggests that this attitude is shifting When compared with six other developed nations on the performance of their healthcare systems Canada ranked sixth only placing ahead of the United States the one country that did not have universal healthcare coverage factors measured include quality of care access efficiency equity and health outcomes These findings suggest that Canadians no longer hold the same value for their once glorified universal healthcare system Instead the system receives an abundance of criticism for its inability to provide quality care to all citizens and is thus currently facing many challenges and structural reforms This report will outline three recommendations to improve the current Canadian healthcare system going lean in healthcare establishing universal prescription drug coverage programs and incorporating virtual health practices into the Canadian healthcare system
