The Candy Corn Contest

**Frances Laverne Carroll, Mary
Meacham**

The Candy Corn Contest:

The Candy Corn Contest Patricia Reilly Giff, 2008-12-24 It's almost Thanksgiving and Richard Best can't stop thinking about Ms. Rooney's Candy Corn contest. Whoever can guess the exact number of yellow and orange candies in the jar on Ms. Rooney's desk gets to keep them all. The only problem is Richard has to read a page in a library book for each guess. Smelly Matthew, who sits in front of him, knows they'll never win. We're the worst readers in the class, he says. But Richard won't give up. He can already taste those Candy Corns. And before he knows it, he has three fat, juicy ones. What will Ms. Rooney do when she finds out?

The Candy Corn Contest Patricia Reilly Giff, 1984 Richard looks forward to the Candy Corn contest in Ms. Rooney's class, but he can't resist sneaking just a few pieces. *Candy Corn Contest* Patricia Reilly Giff, 1984 For use in schools and libraries only. The second grade's contest to see who can guess how many pieces of candy corn are in Ms. Rooney's jar becomes more complicated after Richard Best eats some of the treats.

Hopwood, 2015-06-30 Intended to support the national initiative to strengthen learning in areas of science, technology, engineering, and mathematics, this book helps librarians who work with youth in school and public libraries to build better collections and more effectively use these collections through readers advisory and programming. A versatile and multifaceted guide, *Best STEM Resources for NextGen Scientists: The Essential Selection and User's Guide* serves as a readers advisory and collection development resource for youth services and school librarians seeking to bring STEM-related titles into their collections and introduce teachers and young readers to them. This book not only guides readers to hundreds of the best STEM-related titles (fiction and nonfiction printed materials as well as apps, DVDs, websites, and games), it also includes related activities or programming ideas to help promote the use of the collection to patrons or students in storytime, afterschool programs, or passive library programs. After a detailed discussion of the importance of STEM and the opportunities librarians have for involvement, the book lists and describes best STEM resources for young learners. Resources are organized according to the reading audiences for which they are intended, from toddlers through teens, and the book includes annotated lists of both fiction and nonfiction STEM titles as well as graphic novels, digital products, and online resources. In addition, the author offers a selection of professional readings for librarians and media specialists who wish to further expand their knowledge.
