Classification of Nuclear C-Algebras. Entropy in Operator Algebras* M. Rordam, E. Stormer, 2013-04-18 to the Encyclopaedia Subseries on Operator Algebras and Non Commutative Geometry The theory of von Neumann algebras was initiated in a series of papers by Murray and von Neumann in the 1930 s and 1940 s A von Neumann algebra is a self adjoint unital subalgebra M of the algebra of bounded operators of a Hilbert space which is closed in the weak operator topology According to von Neumann s bicommutant theorem M is closed in the weak operator topology if and only if it is equal to the commutant of its commutant A factor is a von Neumann algebra with trivial centre and the work of Murray and von Neumann contained a reduction of all von Neumann algebras to factors and a classification of factors into types I II and III C algebras are self adjoint operator algebras on Hilbert space which are closed in the norm topology Their study was begun in the work of Gelfand and Naimark who showed that such algebras can be characterized abstractly as involutive Banach algebras satisfying an algebraic relation connecting the norm and the involution They also obtained the fundamental result that a commutative unital C algebra is isomorphic to the algebra of complex valued continuous functions on a compact space its spectrum Since then the subject of operator algebras has evolved into a huge mathematical endeavour interacting with almost every branch of mathematics and several areas of theoretical physics

From Slavery to Freetown Mary Louise Clifford, 2006-01-24 During the American Revolution over 3 000 persons of African descent were promised freedom by the British if they would desert their American rebel masters and serve the loyalist cause Those who responded to this promise found refuge in New York In 1783 after Britain lost the war

they were evacuated to Nova Scotia where for a decade they were treated as cheap labor by the white loyalists In 1792 they were finally offered a new home in West Africa over 1 200 responded and became the founders of Freetown in Sierra Leone This history follows ten of these freed slaves from their escape from masters in Virginia and the Carolinas to their sojourn in wartime New York their evacuation to Nova Scotia and finally their exodus to Freetown where they struggled for another decade for not only freedom and dignity but the right to worship as they choose make an honest living and govern themselves
