The Breakdown Of Cartesian Metaphysics:

The Breakdown of Cartesian Metaphysics Richard A. Watson, 1998-01-01 Combines historical research and philosophical analysis to cast light on why and how Cartesianism failed as a complete metaphysical system Far more radical in its conclusions than his 1966 study *The Downfall of Cartesianism* a slightly revised version of which forms the main body of the current work Watson argues that Descartes's ontology is incoherent and vacuous his epistemology deceptive and his theology unorthodox indeed that Descartes knows nothing

Breakdown of Cartesian Metaphysics Brian Carr, Richard A. Watson, 1987-04 *Pierre Bayle's Cartesian Metaphysics* Todd Ryan, 2009-08-17 This book offers a series of detailed studies of Bayle's engagement with such crucial metaphysical issues as mind/body dualism causation and God's relation to the world It is argued that despite his reputation as a skeptic Bayle is deeply influenced by the metaphysical systems of Descartes and especially Nicolas Malebranche

Cartesian Views Thomas Lennon, 2003-12-01 Many kinds of Cartesian views are treated by these papers the views that Descartes held views from our perspective on those views views on Descartes held by his early critics and followers and views that are Cartesian in outlook not for nothing is Descartes still regarded as the father of modern philosophy These overlapping views provide the unity of this volume and reflect the unity of Richard A. Watson's philosophical work Not least among Watson's contributions has been his depiction of Cartesianism as a response to a set of problems within Descartes's philosophy The later Cartesians were not slavish followers of Descartes The contributors to this volume might be viewed as standing to Watson as the Cartesians did to Descartes Contributors include Jean Robert Armogathe Leslie Armour Alan Gabbey Daniel Garber William H. Gass Alan Hausman David Hausman Thomas M. Lennon Jos R. Maia Neto Steven Nadler Richard H. Popkin Han van Ruler Theo Verbeek Fred Wilson and Alison Wylie

The Downfall of Cartesianism 1673-1712 R. A. Watson, 2012-12-06 Phenomenalism idealism spiritualism and other contemporary philosophical movements originating in the reflective experience of the cogito witness to the immense influence of Descartes However Cartesianism as a complete metaphysical system in the image of that of the master collapsed early in the 18th century A small school of brilliant Cartesians almost all expert in the new mechanistic science flashed like meteors upon the intellectual world of late 17th century France to win well deserved recognition for Cartesianism They were accompanied by a scintillating comet Malebranche the deviant Cartesian now remembered as the orthodox Cartesians are not However all these bright lights faded upon the philosophical horizon almost as soon as they appeared The metaphysical dualism of Descartes was as such neither to be preserved nor reconstructed There are many reasons why the Cartesian system did not survive the victory over Scholasticism which Descartes Malebranche and the others had won Newtonian physics very soon replaced Cartesian physics The practical interest and success of the new science which the Cartesians themselves had nurtured drew men down from the lofty realms of metaphysics On the popular front Cartesianism was attacked and ridiculed for the view that animals are unthinking machines In the schools of Paris and elsewhere there was the general but severe

opposition of pedants which is perhaps of more historical than philosophical interest *Cartesian Metaphysics* Jorge Secada, 2000-04-20 This is the first book length study of Descartes's metaphysics to place it in its immediate historical context the Late Scholastic philosophy of thinkers such as Suarez against which Descartes reacted Jorge Secada views Cartesian philosophy as an essentialist reply to the existentialism of the School and his discussion includes careful analyses and original interpretations of such central Cartesian themes as the role of scepticism intentionality and the doctrine of the material falsity of ideas universals and the relation between sense and understanding causation and the proofs of the existence of God the theory of substance and the dualism of mind and matter His study offers a picture of Descartes's metaphysics that is both novel and philosophically illuminating **Representational Ideas** R. A. Watson, 2012-12-06 In *Representational Ideas* From Plato to Patricia Churchland Watson argues that all intelligible theories of representation by ideas are based on likeness between representations and objects He concludes that 17th century materialist criticisms of having mental representations in the mind apply to contemporary material representations in the brain as proposed by neurophilosophers The argument begins with Plato with particular stress on Descartes Malebranche and Arnauld He then proceeds with an examination of the picture theory developed by Wittgenstein Carnap and Goodman and concludes with an examination of Patricia Churchland Ruth Millikan Robert Cummins and Mark Rollins The use of the historical development of representationalism to pose a central problem in contemporary cognitive science is unique For students scholars and researchers in neuroscience cognitive science philosophy of mind and modern philosophy **Cartesian Philosophers** Vere Claiborne Chappell, 1992 **Berkeley's Metaphysics** R. G. Muehlmann, 1995 This collection of fourteen interpretative essays on the philosophy of George Berkeley 1685-1753 focuses specifically on Berkeley's theory of the nature and variety of existing things The collection is notable for containing the first four winners of the Turbayne International Berkeley Essay Prize only the first of which has been previously published The seven essays in the first part entitled *Idealism* attempt to illuminate Berkeley's notorious thesis that to be is to be perceived that the esse of sensible things trees mountains rivers etc is percipi Most of the essays in this first part are either direct or indirect responses to an influential interpretation of Berkeley's idealism advanced thirty years ago by Edwin B Allaire The second part *Volition Action and Causation* contains four essays focusing on Berkeley's volitionism on his thesis that only the activities of minds volitions are causally efficacious *Vision and the Perceptual Objects* the third part of the volume deals with Berkeley's theory of vision and his doctrine that all of the objects of perception depend on God's will for their existence **The Review of Metaphysics**, 2010 [The History of Ideas: Medieval and early modern Europe](#) Jeremy L. Tobey, 1975 **Journal of the History of Philosophy**, 1993 *Augustinian Cartesian Index* Zbigniew Janowski, 2004 **Aristotelian and Cartesian Logic at Harvard** Rick Kennedy, 1995 Charles Morton was transatlantic Puritanism's most famous educator at the time of his arrival in Boston in 1686 His *Logick System* advocated the vigorous Aristotelian logic popularized by Melancthon William Brattle a generation

younger than Morton was one of Harvard's most beloved tutors Brattle introduced newly fashionable Cartesian logic into the Harvard curriculum His Compendium of Logick ultimately superseded the text of his well known colleague and continued to be used at Harvard until the mid eighteenth century Although Harvard was a small provincial outpost in the history of logic its position in America as a bastion of Puritanism makes it an excellent locale for the examination of one idiosyncratic strain of dogmatic religiously oriented logical thought Morton's and Brattle's texts teach us much about the Puritans especially about the epistemology psychology and theology that supported their particular form of religious rationalism
