and Management of Sitka Spruce* N. Merle Peterson,Patrick Martin,1997-08-01 Sitka spruce the largest of the world s  
spruces is an important component of British Columbia s coastal forests Its ecology gives it a special place in the sustainable  
management of the province s forests However in west coast forestry it is poorly known in comparison with its main  
coniferous companions Douglas fir western redcedar and western hemlock As an important international forestry resource it  
is crucial that Sitka spruce its ecology and the ecosystems in which it occurs be clearly understood by those who are involved  
with its management This book is the most recent major work on the ecology and management of Sitka spruce The authors  
describe how this fascinating tree reproduces grows and functions in its natural geographic range They discuss both the  
ecology of Sitka spruce and silvicultural questions such as original plantation spacing juvenile spacing and fertilization to  
accelerate the harvestability of second growth coastal spruce stands Sitka spruce derives its importance not only from its  
prominence as an international transportable genetic resource but also from its role in riparian systems and its biodiversity  
values Here in North America s west coast rainforest this magnificent tree illustrates the ecology of complex forest  
ecosystems and their cultural wilderness historic and economic values      **Canadian Who's Who 2009** Elizabeth
