## Connecting 2, 4, or 8 Ohm Speakers In Parallel or Series

Multiple speakers can be wired for additional sound depending on the requirements of the stereo or amplifier. This is also helpful when more subwoofers are desired.

## Connecting 2-way Speakers

2-way speakers (like home stereo or component speakers) can be connected in parallel but not in series. Do not go below the minimum rating of the amplifier (4 or 8 ohm rating).

Component speakers (separate tweeter and woofer) are normally wired in parallel and use crossovers for proper sound and to protect the tweeter.
