**Justice in the Marketplace in Early Modern Spain** Michael Thomas D'Emic, 2014-06-17 Justice in the Marketplace in Early Modern Spain examines two late scholastic economic treatises the Provechoso tratado de cambios of Crist bal de Villal n 1542 and the Instruci n de mercaderes of Saravia de la Calle 1544 It does this in the context of the two principal questions that economic historians pose concerning the economic literature of the Spanish late scholastics in general Is there a clear link between this literature and modern economic science and does it manifest a free market orientation Michael D Emic draws two conclusions First there is a palpable relationship between the work of these two authors and modern economic analysis particularly that of financial economics Second the authors fundamentally disagreed on most questions mostly concerning the justice of the free market Villal n condemns the workings of the market and refuses to allow any possibility that the profit motive may be morally neutral With considerable clarity he articulates a cost of production theory of value and advocates a system of prices based upon labor and cost and administered by civil authority Saravia counters with an elegant expression of the utility theory of value and argues with logical force that prices established by the workings of the market are fundamentally just He allows considerable moral latitude to the pursuit of profit which he regards as spiritually dangerous but not necessarily evil Through the lens of their opposing views on economic value the market price and what does or does not constitute the sin of usury the authors with astonishing technical acumen observe analyze and pass moral judgment on a remarkably wide range of complex transactions most of which have counterparts in twenty first century financial markets In the process they tackle problems that still bedevil economists and accountants in our own day such as the difference between a sale and a borrowing the just value of future income flows and the presence of asymmetrical information in pricing The result is a vivid record of the color and texture of early modern economic life that reveals a surprising degree of financial sophistication that the present book makes accessible to the modern reader

**A Theory of Full Employment** Nancy Brenner-Golomb, 2017-11-30 In A Theory of Full Employment Y S Brenner reviews the current drift toward a society he finds neither economically expedient nor morally attractive and N Brenner Golomb discusses the risks involved for science and society in the newfangled sophism hiding behind post modern ideas and political correctness Both authors emphasize the

need to revive the public's political engagement and revise economic theory to restore to society the humane perspective that inspired the welfare state. They contend that if people will abandon outworn habits of thought, consider alternatives and renew their political engagement, they may find useful employment for all who are able and willing to work and end the fear of destitution. Although scientists' philosophical backgrounds seldom influence their answers, they do determine their questions and the final outcome can depend on this. Neoclassical economists are ill equipped to ask questions about the long term dynamic processes of our complex economic reality. They leave out of their models variables not easily quantified and prefer mathematical precision to the study of the intricacy of life. Paul Samuelson, Robert Solow and others have tried to overcome this by grouping self adjusting elements into proxy variables, thus synthesizing neoclassical and Keynesian ideas. But most of today's critics of the ruling dogma go largely unheard. This volume is intended to convince professional economists who study the economic system as a whole to reexamine some of the assumptions behind reigning economic theories. A second objective is to explain to the general public why currently fashionable policies cannot solve massive long term unemployment. Finally, it shows that if political engagement is revived, we may escape the economic morass and moral wasteland into which the fashionable policies have been leading us since the 1970s. This book will appeal to economists, politicians, sociologists and a wider public concerned about today's economic malaise. *CMA/CFM Review* Irvin N. Gleim, Dale L. Flesher, 2002

**Economics of Sport** Mark J. Eschenfelder, Ming Li, 2007. Written for students with some exposure to economics concepts and analysis, this book defines the sport industry and reviews economic concepts before examining in detail such central issues as benefits and costs, the theory of the firm, profit maximisation as a major motivator and alternative motivators in non profit organisations. *EU Customs Law* Timothy Lyons, 2025-08-26. The fourth edition of *EU Customs Law* provides a rigorous and thorough examination of all aspects of EU Customs Law. The work begins by analyzing the international law framework of the EU customs union and their economics, emphasizing the customs union as the foundation of the EU project while also exploring its relationship with the free movement of goods. The evolution of customs legislation is outlined, covering the interpretation and application of customs legislation, customs administrative structures, the financial significance of customs duties and examining the proposed EU Customs Authority and the EU Customs Data Hub. The tariff system and the EU's combined nomenclature are discussed along with various international arrangements. The rules of non preferential and preferential origin are also examined, including those relating to the pan Euro Mediterranean area and the EU-UK trade agreement. Customs valuation and practical aspects such as customs declarations, procedures, customs debt repayment, remission and appeals are addressed. Comprehensive and thought provoking, this authoritative book reflects on the history, current status and future of EU customs law. *The American Economic Review*, 2000

**Papers and Proceedings of the Annual Meeting** American Economic Association, 2000 *CMA Review*, 2005
