Burke Johnson and Larry Christensen offers a comprehensive, accessible introduction to research methods for undergraduate and graduate students. Readers will develop an understanding of the multiple research methods and strategies used in education and related fields, including how to read and critically evaluate published research and how to write a proposal, construct a questionnaire, and conduct an empirical research study on their own. The Eighth Edition maintains the features that made this book a best seller, including attention-grabbing chapter opening vignettes, lively examples that engage student interest, a conversational and friendly writing style, and more. Fully updated for the Seventh Edition of the Publication Manual of the American Psychological Association, this new edition includes expanded information on research ethics and IRBs, expanded and more current information on sampling and causation across research designs, and the latest thinking on mixed methods research. Designed to make learning about research methods enjoyable without sacrificing the necessary rigor, this highly readable text transforms readers into critical consumers and users of research.

*The Sea, Ideas and Observations on Progress in the Study of the Seas* Kenneth H. Brink, Allan R. Robinson, 1998-01-07 The Sea is a prestigious series with a history going back to the classic three volume treatise published by Wiley in 1962-63. Now under the leadership of Allan Robinson, the series is again being extended with five new volumes currently planned, that emphasize the interaction of physical, chemical and biological oceanography. Coastal Ocean Phenomena is the first of these new volumes and it deals with the general principles governing ocean phenomena in regions of shallower water near land. Processes such as tidal effects, global sea level changes, biological productivity and sediment transport are analyzed. Models and methods are emphasized, including remote sensing, models of coastal ocean circulation and data acquisition. Volume 10 presents the general principles and volume 11 is organized geographically to present the results of 35 of regional studies: Eastern North America, the Caribbean, the North Sea and Baltic, the Mediterranean Sea and so forth. Volume 10 is a readable and systematic introduction to coastal

oceanography that is suitable for use with college courses while volume 11 is a much larger reference work Note that volumes 10 and 11 are available together as a set ISBN 0471 11543 6 tent 175 00 The Electrical Review ,1891
