

The following policy template is for example purposes only. It contains the policy mandates that would be typical for a smaller merchant that has only point-of-sale (POS) terminals. Merchants who use this template should make modifications reflective of their specific operational environments. Merchants who have more sophisticated systems (for example: servers, printers, local area networks, etc.) will need to add additional policy mandates to ensure a comprehensive policy.

[Delete this disclaimer once the Merchant's Policy is written to reflect its specific environment]

## **Security Policy**

[Merchant Name]

### **Defining Sensitive Data**

[Merchant Name] defines sensitive data as magnetic stripe data – information on the black strip located on the back of the card, such as the cardholder name, account number, or expiration date. Sensitive data also includes the personal identification number (PIN) of the cardholder and the three- or four-digit validation code located on the front or back of the card.

### **Storage of Cardholder Data**

It is the policy of [Merchant Name] that point-of-sale (POS) terminals used by [Merchant Name] will not store any cardholder data in electronic format.

It is policy that [Merchant Name] will not store any cardholder data in paper format.

For each existing POS terminal, [Merchant Name] will validate with its vendor or vendors whether any POS terminals store cardholder data.

It is policy that [Merchant Name] will not store, in any form, the card validation code (CVC) or card verification value (CVV) – the three- or four-digit number printed on the front or back of a payment card – used to verify card-not-present transactions.

It is policy that [Merchant Name] will not store the PIN or the encrypted PIN block.

It is policy that the primary account number (PAN) will be masked when displayed. On the receipt, only the first six or last four digits will be displayed. **Please Note:** These values are usually blocked out with an asterisk (\*) or an X.

### **Paper Reports and Receipts**

It is the policy of [Merchant Name] that all paper receipts or reports generated from all POS terminals be properly secured from unauthorized access.

solutions for storage analytics big data machine learning and application development It features an array of services that can help organizations to get the best out of their infrastructure This comprehensive guide covers a variety of topics specific to Google s Professional Cloud Architect official exam syllabus and guides you in using the right methods for effective use of GCP services You ll start by exploring GCP understanding the benefits of becoming a certified architect and learning how to register for the exam You ll then delve into the core services that GCP offers such as computing storage and security As you advance this GCP book will help you get up to speed with methods to scale and automate your cloud infrastructure and delve into containers and services In the concluding chapters you ll discover security best practices and even gain insights into designing applications with GCP services and monitoring your infrastructure as a GCP architect By the end of this book you will be well versed in all the topics required to pass Google s Professional Cloud Architect exam and use GCP services effectively What you will learn

Manage your GCP infrastructure with Google Cloud management options such as CloudShell and SDK

Understand the use cases for different storage options

Design a solution with security and compliance in mind

Monitor GCP compute options

Discover machine learning and the different machine learning models offered by GCP

Understand what services need to be used when planning and designing your architecture

Who this book is for

If you are a cloud architect cloud engineer administrator or any IT professional who wants to learn how to implement Google Cloud services in your organization and become a GCP Certified Professional Cloud Architect this book is for you

Basic knowledge of server infrastructure including Linux and Windows Servers is assumed

Knowledge of network and storage will also be helpful
