## **Social Change And The Life Course:**

**Social Change and Human Development** Rainer K Silbereisen, Xinyin Chen, 2010-04-28 Today's world is characterized by a set of overarching trends that often come under the rubric of social change. In this innovative volume Rainer K Silbereisen and Xinyin Chen bring together for the first time international experts in the field to examine how changes in our social world impact on our individual development. Divided into four parts, the book explores the major socio-political and technological changes that have taken place around the world from post-war to the rapid upheavals in the 1990s, Europe to the gradual changes in parts of East Asia, and explains how these developments interplay with human development across the lifespan. Human Development and Social Change is a useful resource for students and researchers involved in all areas of human development, including developmental psychology, sociology, and education.

*Social Structures and Human Lives* Matilda White Riley, Bettina J. Huber, Beth B. Hess, 1988-09 Social Structures and Human Lives consists of papers from the 1986 American Sociological Association annual meeting selected to reflect the rich and diverse array of conceptual, methodological, and substantive reports presented there. Leading academics and researchers in the field offer information about aging over the life course, the relationship between aging and the changing structure of families, firms, state, and society as a whole, and implications for equality of opportunity for people of differing age, gender, race, and socioeconomic status. A final chapter links selected topics from previous chapters to established sociological concerns and clarifies the broad scope of the book's central theme.

**Higher Education and the Reproductive Life Course** Sarbani Banerjee, 2006 This study examines the impact of higher educational attainment on the changing lives of women both at the individual and the societal level. The study focusses on the cross-cultural contexts in one of the states in South India and the Netherlands. Karnataka in the recent times is experiencing fertility transition while the Netherlands has already achieved fertility transition. The two cultural contexts are both diverse and unique in character. The author explores both the uniqueness as well as the similarities, hence studying the impact of higher education on the changing lives of women as a continuum across cultures and societies. Changes at the individual level are captured by distinguishing women into older and younger generations, while changes at the societal level are captured through social change. At the individual level we distinguish between the lived life course and the perceived life course. At the societal level we focus on how higher educational attainment has enhanced women's position in the society. The study uses secondary data from the National Family Health Survey 1998-1999 for the state of Karnataka and the Netherlands Family Fertility Survey OG 98. In addition to the secondary data, in-depth interviews were also conducted amongst women in Bangalore and Groningen.

**Handbook of the Life Course** Michael J. Shanahan, Jeylan T. Mortimer, Monica Kirkpatrick Johnson, 2015-10-26 Building on the success of the 2003 Handbook of the Life Course, this second volume identifies future directions for life course research and policy. The introductory essay and the chapters that make up the five sections of this book show consensus on strategic next steps in life course studies. These next steps are

explored in detail in each section Section I on life course theory provides fresh perspectives on well established topics including cohorts life stages and legal and regulatory contexts It challenges life course scholars to move beyond common individualistic paradigms Section II highlights changes in major institutional and organizational contexts of the life course It draws on conceptual advances and recent empirical findings to identify promising avenues for research that illuminate the interplay between structure and agency It examines trends in family school and workplace as well as contexts that deserve heightened attention including the military the criminal justice system and natural and man made disaster The remaining three sections consider advances and suggest strategic opportunities in the study of health and development throughout the life course They explore methodological innovations including qualitative and three generational longitudinal research designs causal analysis growth curves and the study of place Finally they show ways to build bridges between life course research and public policy

*Social Dynamics of the Life Course* Walter R. Heinz, Victor W. Marshall, In the last two decades research on the life course has successfully combined and integrated different and rather isolated fields of social concerns such as the labor market family solidarity education employment retirement and social policy It has also developed a special focus on crucial problems of sociological research which includes the understanding of micromacro phenomena the dynamics of social change and international comparisons Contributors to this volume take an international comparative approach in applying the life course theoretical framework to issues of work and career Life course research focuses on the relationship between institutions and individuals across the life span and illuminates the impact of modernization on the shaping of biographies Industrial service societies are characterized by historically new contingencies of living arrangements and biographies These contingencies differ according to the extent to which life course patterns are regulated by social institutions In the continental European context institutional frameworks continue to define the timing and sequencing of transitions across the life course In less regulated market societies like the United States and Great Britain biographies and living arrangements are shaped more by the interaction of markets social networks and individual decisions In active welfare states institutional resources and rules continue to mediate the effects of social change on the life course What the editors and contributors to this fine compendium anticipate is a change on the cultural level toward more equality This trend supports young people and women in particular in their expectations concerning an egalitarian relationship This expectation is not taken for granted from the point of view of the male partner but has to be negotiated in decisionmaking processes as an issue that concerns the couple as a unit Thus the way in which people interact is profoundly impacted by the values and goals of equity demands Walter R Heinz is professor of sociology and social psychology and director Graduate School of Social Sciences University of Bremen Victor W Marshall is professor of sociology and director of the Institute on Aging University of North Carolina at Chapel Hill Carolina

with three generations living together and that this ideal family broke down under the impact of urbanization and  
industrialization The essays in this volume challenge this myth and provide dramatic revisions of simplistic notions about  
change in the American family Based on detailed research in a variety of sources including extensive oral history interviews  
of ordinary people these essays examine major changes in family life dispel myths about the past and offer new directions in  
research and interpretation The essays cover a wide spectrum of issues and topics ranging from the organization of the  
family and household to the networks available to children as they grow up to the role of the family in the process of  
industrialization to the division of labor in the family along gender lines and to the relations between the generations in the

results Sociological life course research like biographical research has developed into an independent and fruitful field of  
research since the end of the 1960s It is true that half a century earlier in their famous study of *The Polish Peasant in Europe*  
and America 1918 20 Thomas and Znaniecki had already used life records to examine the connection between social change  
social structures and the life histories of individuals However such a research perspective was supplanted by other  
methodological conceptual approaches to empirical social research for over fifty years It was not until the 1960s that  
sociological interest in life course and biographical theoretical issues reawakened Today life course research is considered  
one of the most important conceptual innovations in sociology in recent decades The content The life course as a social
