

Snow Season

Marco Cascella

Snow Season:

Impact of Mountain Pine Beetle Infestation and Salvage Harvesting on Seasonal Snow Melt and Runoff Sarah Boon, 2008
This study examines the impact of mountain pine beetle infestation on forest canopy structure on the Nechako Plateau and the resulting impacts on snow accumulation and ablation under varied climatic conditions. Stand scale results were used to drive a physically based distributed hydrological model of the Van Tine Creek watershed and assess watershed scale hydrologic response to four harvesting infestation scenarios.
