book examines the current literature and knowledge on the evolution and ecology of all the birds named as eagles with
particular emphasis on the larger species It also examines the past and current relations between eagles and people
including habitat change and conservation issues Eagle ecologies and conservation are currently seriously impacted by
human activities such as industrialization urbanization pollution deforestation and hunting Some eagle species have
consequently experienced extreme population changes There are however some positive developments Eagles have a strong
historic bond with human civilization due to their status as the world s most charismatic birds Conservation policies have also
been successful in repopulating some ecosystems with breeding eagles Therefore despite the complexity of this relationship
there may yet be hope for this unique species group frequently rated as the kings of birds and symbolic of human power
ambition royalty nationality and even concepts of God It is hoped that this book will contribute to the further understanding
of these unique and fantastic birds *ILA* Steck-Vaughn Staff,1998-01-01
