**Digest of Education Statistics**, 2000 Contains information on a variety of subjects within the field of education statistics including the number of schools and colleges, enrollments, teachers, graduates, educational attainment, finances, Federal funds for education, libraries, international education and research and development. **Handbook of Reading Assessment** Sherry Mee Bell, R. Steve McCallum, 2015-07-30 The Handbook of Reading Assessment Second Edition covers the wide range of reading assessments educators must be able to use and understand to effectively assess and instruct their students. Comprehensive and filled with numerous authentic examples, the text addresses informal classroom based assessment, progress monitoring, individual norm referenced assessment and group norm referenced or high stakes testing. Coverage includes assessment content relevant for English language learners and adults. A set of test guidelines to use when selecting or evaluating an assessment tool is provided. New and updated in the Second Edition, Impact on reading assessment of Common Core Standards for literacy increased top down focus on accountability and high stakes tests, innovations in computerized assessment of reading, Latest developments in Response to Intervention RTI model particularly as they impact reading assessment, International Reading Association standards for reading, educators and brief discussion of International Dyslexia Association standards. Types of reading assessment including discussion of formative versus summative assessment, Expanded coverage of assessment of reading motivation, Expanded coverage of writing assessment, New and revised assessments across genres of reading assessment, Companion Website, numerous resources relevant to reading and writing assessment, suggestions for evidence based instructional practices that can be linked to assessment results, PowerPoint slides, test bank, study guides, application exercises. **Uncommon Measures** National Research Council, Division of Behavioral and Social Sciences and Education, Board on Testing and Assessment, Committee on Equivalency and Linkage of Educational Tests, 1998-11-30 The issues surrounding the comparability of various tests used to assess performance in schools received broad public attention during congressional debate over the Voluntary National Tests proposed by President Clinton in his 1997 State of the Union Address. Proponents of Voluntary National Tests argue that there is no widely understood challenging benchmark of individual student performance in 4th grade reading and 8th grade mathematics, thus the need for a new test. Opponents argue that a statistical linkage among tests already used by states and districts might provide the sort of comparability called for by the president's proposal. Public Law 105-78 requested that the National Research Council study whether an equivalency scale could be developed that would allow test scores from existing commercial tests and state

assessments to be compared with each other and with the National Assessment of Education Progress In this book the committee reviewed research literature on the statistical and technical aspects of creating valid links between tests and how the content use and purposes of education testing in the United States influences the quality and meaning of those links The book summarizes relevant prior linkage studies and presents a picture of the diversity of state testing programs It also looks at the unique characteristics of the National Assessment of Educational Progress Uncommon Measures provides an answer to the question posed by Congress in Public Law 105 78 suggests criteria for evaluating the quality of linkages and calls for further research to determine the level of precision needed to make inferences about linked tests In arriving at its conclusions the committee acknowledged that ultimately policymakers and educators must take responsibility for determining the degree of imprecision they are willing to tolerate in testing and linking This book provides science based information with which to make those decisions
