*Closing the Knowledge-Implementation Gap in Conservation Science* Catarina C. Ferreira, Cornelya F. C.

Clütsch, 2022-01-03 This book aims to synthesize the state of the art on biodiversity knowledge exchange practices to understand where and how improvements can be made to close the knowledge implementation gap in conservation science and advance this interdisciplinary topic. Bringing together the most prominent scholars and practitioners in the field, the book looks into the various sources used to produce biodiversity knowledge from natural and social sciences to Traditional Ecological Knowledge and Citizen Science as well as knowledge mobilization approaches to highlight the key ingredients that render successful conservation action at a global scale. By doing so, the book identified major current challenges and opportunities in the field for different sectors that generate, mobilize and use biodiversity knowledge like academia, boundary organizations, practitioners and policy makers to further develop cross sectorial knowledge mobilization strategies and enhance evidence informed decision making processes globally. Handbook of Sustainability Science in the Future Walter Leal Filho, Anabela Marisa Azul, Federica Doni, Amanda Lange Salvia, 2023-08-14 Humanity will have to cope with many problems in the coming decades for instance the world population is likely grow to 8.8 billion people by 2035. Also changing climate conditions are negatively affecting the livelihoods of millions of people. In particular environmental disasters are causing substantial damages to properties. From a social perspective the inequalities between rich and poor nations are becoming even deeper and in many countries conflicts between national and international interest groups are intensifying. The above state of affairs suggest that a broader understanding of the trends which may lead to a more sustainable world is needed especially those which may pave the way for future developments. In other words we need to pave the way for sustainable futures. Consistent with this reality the proposed Encyclopedia of Sustainability Futures aims to identify, document and disseminate ideas, experiences and visions from scientists, member of nongovernmental organisations, decision makers, industry representatives and citizens on themes and issues which will be important in pursuing sustainable future scenarios. In particular the publication will focus on scientific aspects as well as on social and economic ones also considering matters related to financing and infra structures which are important in pursuing a sustainable future. The Encyclopedia of Sustainability Futures will involve the contributing authors in line with the principle of co-generation from across a wide range of disciplines e.g. education and social sciences, natural sciences, engineering, the arts, languages etc. with papers adopting a long term sustainability perspective with a time horizon until 2050. The focus will be on themes which are felt as important in the future and the chapters are expected to interest and motivate a world audience. This book is part of the 100 papers to accelerate the implementation of the UN Sustainable Development Goals initiative. **Directory of Distance Learning Opportunities** Modoc Press,
