## The Alps:

*Geology of the Alps* O. Adrian Pfiffner, 2014-06-03 The Alps with their outstanding outcrop conditions represent a superb natural laboratory for many geological processes and have played a crucial role in the history of geology This book gives an up to date and holistic overview of the key aspects of Alpine geology After a brief presentation of the plate tectonic framework the rock suites are discussed starting with the pre Triassic crystalline basement followed by Paleozoic Mesozoic and Cenozoic sedimentary sequences The lithological description of the rock types is supplemented by a discussion of their paleogeographic and plate tectonic contexts The book goes on to describe the structure of the Alps including the Jura Mountains and the Alpine foreland to the north and south illustrated by numerous cross sections The evolution of the Alps as a mountain chain incorporates a discussion of the Alpine metamorphic history and a compilation of orogenic timetables The final sections cover the evolution of Alpine drainage patterns and the region s glacial history Readership The book is essential reading for students and lecturers on Alpine courses and excursions and all earth scientists interested in the geology of the region “A” *Handbook for Travellers in Switzerland and the Alps of Savoy and Piedmont* John Murray, 1879

serve as a classical example of collisional orogens it becomes clearer that substantial questions on their evolution can only be answered in the Carpathians and Dinarides Our understanding of the geodynamic evolution of the Alpine Dinaride Carpathian System has substantially improved and will continue to develop this is thanks to collaboration between eastern and western Europe but also due to the application of new methods and the launch of research initiatives The largely field based contributions investigate the following subjects pre Alpine heritage and Alpine reactivation Mesozoic palaeogeography and Alpine subduction and collision processes extrusion tectonics from the Eastern Alps to the Carpathians and the Pannonian Basin orogen parallel and orogen perpendicular extension record of orogeny in foreland basins tectonometamorphic evolution and relations between the Alps Apennines and Corsica **The Alps** ,1973 Wonderful and awesome the Alps indeed are a broken barrier of snow frosted peaks stretching across Europe from France to Yugoslavia Jacket **The Alpine guide** John Ball,1869 *Hours of Exercise in the Alps* John Tyndall,1873 **Hours of exercise in the Alps.
