## **The Age Of The Automobile:**

**The Age of the Automobile** George Bishop, 1977      **The Life of the Automobile** Steven Parissien, 2013-10-17 In this book Steven Parissien examines the impact development and significance of the automobile over its turbulent and colourful 130 year history He tells the story of the auto and of its creators from its earliest appearance in the 1880s as little more than a powered quadricycle via the early pioneer carmakers the advances of the interwar era the Golden Age of the 1950s and the iconic years of the 1960s to the decades of doubt and uncertainty following the oil crisis of 1973 which culminated in the global mergers of the 1990s and the bailouts of the early twenty first century This is not just a story of horsepower and performance The Life of the Automobile is a tale of people of intuitive carmakers such as Benz Agnelli Royce and Citro n of exceptionally gifted designers such as Issigonis Lefebvre Michelotti and Bangle and of visionary industrialists such as Ford Tata and Porsche Above all The Life of the Automobile demonstrates how the epic story of the car mirrors the history of the modern era from the brave hopes and soaring ambitions of the early twentieth century to the cynicism and ecological concerns of a century later      **The Age of the Automobile** Harold James Perkin, 1976      The Automobile Age James J. Flink, 1990-07-19 In this sweeping cultural history James Flink provides a fascinating account of the creation of the world s first automobile culture He offers both a critical survey of the development of automotive technology and the automotive industry and an analysis of the social effects of automobility on workers and consumers      **The Cultural Life of the Automobile** Guillermo Giucci, 2012-05-24 From its invention in Europe at the end of the nineteenth century the automobile crisscrossed the world completely took over the cities and became a feature of daily life Considered basic to the American lifestyle the car reflected individualism pragmatism comfort and above all modernity In Latin America it served as a symbol of distinction similar to jewelry or fine clothing In The Cultural Life of the Automobile Guillermo Giucci focuses on the automobile as an instrument of social change through its kinetic modernity and as an embodiment of the tremendous social impact of technology on cultural life Material culture how certain objects generate a wide array of cultural responses has been the focus of much scholarly discussion in recent years The automobile wrought major changes and inspired images in language literature and popular culture Focusing primarily on Latin America but also covering the United States Europe Asia and Africa Giucci examines how the automobile was variously adapted by different cultures and how its use shaped and changed social and economic relationships within them At the same time he shows how the automobilization of society became an essential support for the development of modern individualism and the automobile its clearest material manifestation      *Horse Trading in the Age of Cars* Steven M. Gelber, 2008-10 Gelber s highly readable and lively prose makes clear how this unique economic ritual survived into the industrial twentieth century in the process adding a colorful and interesting chapter to the history of the automobile      *Government Regulation of the Automobile Industry* United States. Congress. Senate. Committee on Banking, Housing, and Urban Affairs. Subcommittee on Economic Stabilization, 1979

**The Age of the Automobile** ,1981      **The Age of the Muscle Car** Clay Fees,2022-02-01 A breed unlike any seen before or since the powerful stylish American muscle car defined an era in automotive history This history traces the rise and fall of these great performance cars from their precursors in the 1950s through the seminal appearance of the Pontiac GTO in 1964 and then year by year to the end in the 1970s Approachable and nontechnical yet deeply informative it puts the bygone muscle car in its cultural and aesthetic contexts describes developments in styling performance and marketing and revels in the joys of muscle car ownership in the 21st century      *The Automobile and American Life*, 2d ed. John Heitmann,2018-08-03 Now revised and updated this book tells the story of how the automobile transformed American life and how automotive design and technology have changed over time It details cars inception as a mechanical curiosity and later a plaything for the wealthy racing and the promotion of the industry Henry Ford and the advent of mass production market competition during the 1920s the development of roads and accompanying highway culture the effects of the Great Depression and World War II the automotive Golden Age of the 1950s oil crises and the turbulent 1970s the decline and then resurgence of the Big Three and how American car culture has been represented in film music and literature Updated notes and a select bibliography serve as valuable resources to those interested in automotive history      The Age of Reason ,2007 In cross sectional data sets from ten credit markets we find that middle aged adults borrow at lower interest rates and pay fewer fees relative to younger and older adults Fee and interest payments are minimized around age 53 The measured effects are not explained by observed risk characteristics We discuss several leading factors that may contribute to these effects including age related changes in experience and cognitive function selection effects and cohort effects      The Age of the Automobile H. J. Perkin,2016-07-31 This lively work offers a wide ranging account of the social history of the motorised age and of the machine which has reshaped the character and development of the modern world It places the development of the car and of its more sinister cousins the tank and the war plane in their context and impact on society in peace and war from the Edwardian period onwards The author shows that automobiles in particular represented a modernity which promised to the individual power over time space and their own personal machine They were emblems too of sex appeal and of the new consumerism They were prismatic of modern society itself and a futuristic key to its social history And as they came down in price over time they opened up the world anew to the middle and then the working class This is a social history of modern Britain at its most focussed on issues that really matter      **The Age of the Molecule** Frank W. Dobbs,1976

The Automobile ,1917      Automotive Industries, the Automobile ,1932      **Report of the Proceedings of the ... Annual Convention of the Master-Car Builders' Association** Master Car Builders' Association,1895      **Automobile Cases** ,1962      **The Law Applied to Motor Vehicles** Charles Jacob Babbitt,1933      The Mutual Link ,1943      Electric Railway Review ,1891
