The Alternative Factor:

The Skills of Argument Deanna Kuhn, 1991-07-26 The Skills of Argument presents a comprehensive empirical study of informal reasoning as argument involving subjects across the life span Subjects ranging in age from adolescence to late adulthood were asked to describe their views on social problems that people have occasion to think and talk about in everyday life such as crime and unemployment In addition to providing supporting evidence for their theories subjects were asked to contemplate alternative theories and counterarguments and to evaluate new evidence on the topics This is the first major study of informal reasoning across the life span Highlighting the importance of argumentative reasoning in everyday thought the book offers a theoretical framework for conceptualizing and studying thinking as argument The findings address issues of major importance to cognitive and developmental psychologists as well as educators concerned with improving the quality of people's thinking The work is also relevant to philosophers political scientists and linguists interested in informal reasoning and argumentative discourse

The Five-Factor Model of Personality Across Cultures Robert R. McCrae, Juri Allik, 2012-12-06 ROBERT R MCCRAE it is simply personality research conducted in different countries The implicit assumption behind this practice is that personality processes are universal and where they are studied is thus of no consequence An insensitivity to cultural context once imputed mostly to Americans now appears to characterize the field worldwide Fortunately recent years have also seen a rise of interest in studies of personality and culture Church 2001 Church Lee McCauley McCrae 2000 What do these new studies show Are personality processes indeed universal or are there significant variations across cultures that necessitate a more nuanced approach to research There is as yet no definitive answer to that question In some respects human personality does seem to transcend the boundaries of language and culture in other respects it is profoundly influenced by social and historical forces Sorting these issues out must be a priority for our field if we are to understand the current personality literature
