Torroella Carney,2024-06-04 A history of aging in the United States and an innovative blueprint for revolutionizing care for older adults from Northwell Health New York's largest health care system The New York Times described Dr Robert Butler as the man who saw old age anew In his 1975 book *Why Survive Being Old in America* Butler argued that for far too many people old age was a period of quiet despair and muted rage and he set out to mitigate it Nearly five decades since he penned his book a devoted band of brilliant physicians and others in the healthcare field have realized at least a portion of Butler's dream to recognize and alleviate suffering among the aging The *Aging Revolution* is the story of Butler and his disciples women and men who saw older distressed adults in hospitals and homes and worse being ignored by most of the medical establishment These revolutionaries could not ignore the suffering and they set out individually and collectively to create entirely new ways of caring for aging adults to ease their suffering and improve their quality and length of life This revelatory book tells a story never before told in its entirety recounting the one of the most significant periods of improvement in American medical history Readers will learn about pioneering individuals concepts and ideas that have improved the lives of millions including the women who placed the spotlight on delirium and falls major issues for older adults the campaign to build and spread Geriatric and Palliative Care the small bands of doctors who worked the halls of Congress to create a new program that provides primary care along with home visits from healthcare professionals and the New York based foundation that has devoted its mission and millions exclusively to improving care and quality of life for aging adults Today as a result chronic conditions that almost always accompany old age are far more manageable Older people enjoy more options for work and professional development for education for leisure and travel for sports and maintaining physical strength and mobility For increasing numbers of Americans life is healthier and richer in the experiences that matter most Yet aging in America can still be a challenge and too often particularly for the poor a painful struggle The range of mental and physical well being has almost infinite variations ninety year olds running marathons sixty five year olds incapacitated by stroke While this book celebrates the incredible progress and strides made in this field it also highlights areas that need improvement The authors lay out specific steps that if implemented could ignite the aging revolution and diminish the total volume of older adults suffering in America      **The Age of Revolution** E. Hobsbawm,1980      ,      *Aging* ,1988      **Longevity and Quality of Life** Robert N. Butler,Claude Jasmin,2012-12-06

Nations around the world are experiencing a spectacular increase in longevity. Society as a whole is being challenged by issues arising from this revolution in longevity. Although the specter of the loneliness and existential suffering of older citizens is such that some people under the age of 65 find it difficult to conceive of a long term future, persons over 85 have proven that aging does not necessarily preclude a healthy and productive life. Extraordinary progress in both curative and preventive medicine justifies optimism about the quality of life and state of well being that can be enjoyed even in great old age. We should look to professionals in diverse fields to develop creative solutions to the inevitable issues that will arise with aging. Governments must prepare for the future health of their citizens by making long term investments to educate all sectors of society in the value of good nutrition, exercise and lifestyles that enhance well being throughout life. Also, governments should realize that the main cause of health care expenditure is serious illness which occurs in persons of all ages and not predominantly in older people. Early detection can help save lives as well. Health and longevity of life will ultimately end as a political issue. What is needed is long term government investments necessary for a viable health policy. The question arises: will world leaders be able to commit to such a policy? Two major socioeconomic phenomena may have a regulating effect on this issue. The first is the emergence of pressure groups that have come into being in response to a particular health issue such as AIDS. The second is the emergence of ethics committees in developed nations that deal solely with health issues.

*New Dynamics in Old Age* Hans-Werner Wahl, Clemens Tesch-Romer, Dr. Andreas Hoff, Jon Hendricks, 2017-07-05

This book was nurtured by the belief that the new dynamics of today's and tomorrow's aging has not yet been treated well in the gerontology literature. Several questions drove the choice of substance for the book: What kind of new dynamics of aging deserves consideration? What kinds of theories and fields are at the core of treating such a new dynamics? And what kind of empirical evidence should be considered? The master hypothesis on which the book is based maintains that the new dynamics of old age is best observed in a range of everyday aging contexts that have been undergoing major change since the second half of the 20th century. In particular, five areas of new and persistent dynamics are treated in depth: the social environment with a focus on cohort effects in social relations and the consideration of family relations and elders as care redelivers the home environment with emphasis on housing and quality of life; relocation and urban aging issues; the outdoor environment with consideration of out of home activity patterns; car driving behaviour and the leisure world of aging; the technological environment with treatments of the role of the Internet and the potential of technology for aging outcomes; and the societal environment with a focus on global aging, the new politics of old age and older persons as market consumers. The book's main purpose is to provide the scholarly gerontology community with a comprehensive and critical discussion of these new trends related to old age. The book will be of interest for the scholarly community of gerontology in a variety of disciplines: sociology, psychology, demography, epidemiology, humanities, social policy and geriatrics; students in gerontology education and in the disciplines named above who have an interest in aging issues; graduate level

professionals in practical and applied fields related to aging such as community and urban planners health and care providers and policymakers people involved in senior citizens organizations and those in industry who wish to serve older people with new products
