## **The American Landscape Tradition:**

**The American Landscape Tradition** Joseph S. Czestochowski, 1982 Contains 176 landscapes painted by 126 American artists between 1740 and 1965 with accompanying text **Green Woods & Crystal Waters** John Arthur, Philbrook Museum of Art, 1999 Formally and expressively diverse the works range from the objective depiction of the physical appearance of nature to the romantic or mystical use of landscape as a vehicle for poetic and spiritual concerns to the expressionist s reshaping of nature to follow the curvature of interior moods Includes 100 color illustrations checklist of the exhibition bibliography and index of artists **BOOK JACKET** **Nature and Culture** Barbara Novak, 2007-02-12 In this richly illustrated volume featuring more than fifty black and white illustrations and a beautiful eight page color insert Barbara Novak describes how for fifty extraordinary years American society drew from the idea of Nature its most cherished ideals Between 1825 and 1875 all kinds of Americans artists writers scientists as well as everyday citizens believed that God in Nature could resolve human contradictions and that nature itself confirmed the American destiny Using diaries and letters of the artists as well as quotes from literary texts journals and periodicals Novak illuminates the range of ideas projected onto the American landscape by painters such as Thomas Cole Albert Bierstadt Frederic Edwin Church Asher B Durand Fitz H Lane and Martin J Heade and writers such as Ralph Waldo Emerson Henry David Thoreau and Frederich Wilhelm von Schelling Now with a new preface this spectacular volume captures a vast cultural panorama It beautifully demonstrates how the idea of nature served not only as a vehicle for artistic creation but as its ideal form An impressive achievement Barbara Rose The New York Times Book Review An admirable blend of ambition elan and hard research Not just an art book it bears on some of the deepest fantasies of American culture as a whole Robert Hughes Time Magazine *The Influence of Dutch Landscape Painting on the American Landscape Tradition* Lois Engelson, 1966 *Nature and Culture* Barbara Novak, 2007-01 In this illustrated volume including a number of stunning color prints the author explains that for fifty extraordinary years American society bestowed in the idea of Nature its most cherished ideals Between 1825 and 1875 all kinds of Americans artists writers scientists as well as everyday citizens believed that God in Nature could resolve human contradictions and that nature itself confirmed the American destiny During these years Nature God and Man converged to become a trinity and it was through the landscape painters the leaders of this intellectual movement that the nation was reminded of divine benevolence by keeping before their eyes the mountains trees forests and lakes Using diaries and letters of the artists as well as quotes from literary texts journals and periodicals the author illuminates the range of ideas projected on to the American landscape by painters such as Thomas Cole Albert Bierstadt Frederic Edwin Church Asher B Durand Fitz Hugh Lane and Martin J Heade and writers such as Ralph Waldo Emerson Henry David Thoreau William Wordsworth Theodore Rousseau and Frederich Wilhelm Schelling Adding a new dimension to the discussion of nature s influence on the American mind she explains how religion philosophy science and literatrue served as the support system for the idea of God in Nature She shows

that the idea of nature as a national vested interest was invaluable to a young expanding nation but ultimately this essentially monolithic view collapsed from within undermined by the Civil War Darwinism and a burgeoning technological landscape Taking American landscape painting in its golden era as a product of society she examines the cultural background of paintings as an index to their intrinsic meaning She explains for example how new discoveries in science were made consonant with Deity how religion itself permeated nature with the idea of Creation and how the landscape artists were given the task of providing the images of nature that became the national iconography She goes on to demonstrate how American landscapists handling rocks clouds plants and other natural elements paralleled and diverged from scientific developments and also how the landscapists who accompanied explorers on their westward expeditions related to their scientific colleagues With a new introduction this volume encompasses a vast cultural panorama It demonstrates how the influence of the nature served not only as a vehicle for artistic creation but as its ideal form **Progress on the Land** Susan Elizabeth Wells,2002

Homer Eakins and Ryder      *The Changing American Countryside* Emery N. Castle,1995 The literature on rural America to the extent that it exists has largely been written by urban based scholars perpetuating out of date notions and stereotypes or by those who see little difference between rural and agricultural concerns As a result the real rural America remains much misunderstood neglected or ignored by scholars and policymakers alike In response Emery Castle offers *The Changing American Countryside* a volume that will forever change how we look at this important subject Castle brings together the writings of eminent scholars from several disciplines and varying backgrounds to take a fresh and comprehensive look at the forgotten hinterlands These authors examine the role of non metropolitan people and places in the economic life of our nation and cover such diverse issues as poverty industry the environment education family social problems ethnicity race religion gender government public policy and regional diversity The authors are especially effective in demonstrating why rural America is so much more than just agriculture It is in fact highly diverse complex and interdependent with urban America and the international market place Most major rural problems they contend simply cannot be effectively addressed in isolation from their urban and international connections To do so is misguided and even hazardous when one fourth of our population and ninety seven per cent of our land area is rural Together these writings not only provide a new and more realistic view of rural life and public policy but also suggest how the field of rural studies can greatly enrich our understanding of national life      *The National Cyclopedic Company, Being the History of the United States as Illustrated in the Lives of the Founders, Builders, and Defenders of the Republic, and of the Men and Women who are Doing the Work and Moulding the Thought of the Present Time* ,1899      **Pioneers of American Landscape Design** Charles A.
