Consequently, the results of the present study suggest that the use of a single, low-dose, oral, short-acting PDE5 inhibitor may be a safe and effective treatment for patients with mild to moderate hypertension.

They are not the same, however, because the former is a generalization, while the latter is a specific instance of the former.

Other than a few minor differences, the following are the main differences between the two versions of the software. The differences are minor, but they are significant enough to warrant a separate section.

Some limited improvements occurred. It was this combined situation of more severe weather, more severe droughts, and declining groundwater storage, which drove the water management agencies to consider drought related or groundwater related measures. Many groundwater protection measures have been adopted. Amongst these measures are the following: *Groundwater Management* of the groundwater resources (e.g. 1991), *Well Dewatering* for the water supply, *Groundwater Recharge* and *Groundwater Replenishment* and *Groundwater Reuse*. The latter measure is the subject of this paper. The following sections will describe the various measures and their effects on the water availability, economy and life. The economy again requires attention, as water availability may not be the only factor that influences economic development. The following sections will describe the water availability and groundwater management measures, followed by a discussion of the economic effects of water availability.
