motorists requirements and a demonstration that currently available signals exceed these specifications when properly maintained 2 the evaluation of seven alterations to standard crossing signal design and operation with respect to performance improvement and maintenance requirements several of these modifications offer attractive cost benefit attributes and are recommended for implementation and 3 the development and evaluation of three tools of potential value to signal maintenance crews an alignment scope to aid in aiming of the signal for maximum effectiveness a signal focusing tool to aid in the critical positioning of the signal lamp with respect to the reflector and a signal flux meter for measuring the light output of crossing and traffic signals all of these tools were proven effective and would be useful to a conscientious maintenance team The prototype signal hardware underwent rigorous laboratory environmental and field tests The maintenance tools were evaluated under laboratory conditions Vol III is intended to be a stand alone handbook for potential users of the project s developments     Mechanical Engineering American Society of Mechanical Engineers,1947     **Korea**
