Sometimes Im Afraid:

Sometimes I'm Scared Jane Annunziata, Marc A. Nemiroff, 2009 Kids can be afraid of lots of things this book outlines easy steps kids can use to overcome their everyday fears *Sometimes I'm Afraid* Michaelene Mundy, 2014-08-19 We want our kids to be safe happy and well adjusted But we all know that our children like us have to face a lot of difficult things in their lives And one of them is fear Although adults have learned that one of the best remedies for tackling fears is an abundance of love and care children still need support and guidance In *Sometimes I m Afraid A Book about Fear Just for Me* author Michaelene Mundy helps young readers understand what it means to be afraid and how to find courage and support in their friends and loved ones **The Gentleman's Magazine** ,1881 **The Journal of Psychohistory** ,1982 Gentleman's Magazine and Historical Review ,1881 Life Span Perspectives of Suicide A.A. Leenaars, 2013-06-29 In recent years a great deal of interest has been focused on suicide in the elderly and in the young However in line with modern trends in psychology sociology psychiatry anthropology and other human health fields interest has now shifted to suicide across the life span from childhood through adulthood to old age This book has been conceptualized within this developing tradition There are various ways in which life s timelines can be conceptualized Developmental theory we believe should be open ended This has widened and will continue to widen our understanding of many complicated human acts including suicide Though suicide is in many ways the same across the entire life span understanding the time lines in the suicidal process is imperative To do so however is we believe challenging In this volume we attempt to engage in the process of understanding suicide from a developmental perspective To do this we have been fortunate to obtain the cooperation of a highly competent group of contributors One interesting footnote to our list of authorities is that they represent suicidologists from across the life span a few who are at the beginning of their careers a large number in their middle years and a few who are in the Indian summer of their professional lives The Psychic World of Peter Hurkos Norma Lee Browning, 2000-08 Book Description When the Dutch psychic Peter Hurkos approached Norma Lee Browning to write his story her reply was blunt You know better than to ask me I m the one who exposes people like you Norma Lee Browning is a professional skeptic a journalist with a reputation for exposing frauds and charlatans Hurkos persisted The result is this incredible book in which Browning skeptic proves beyond a reasonable doubt that Peter Hurkos is a man with phenomenal psychic powers a man who can conjure up the past envision the future and describe people and places he has never seen Hurkos has also participated in missing persons and murder investigations across the United States To fully describe a man like Peter Hurkos is not possible Ms Browning deals in facts in names and places and dates and these facts speak for themselves Author s Bio A well known columnist and reporter Norma Lee Browning has written numerous books including the fascinating *FACELIFTS Everything You Always Wanted to Know* She lives in Palm Springs California **This Strange and Sacred Scripture** Matthew Richard Schlimm, 2015-02-10 The Old Testament can seem strange and disturbing to contemporary readers What should Christians

make of Genesis 13 seemingly at odds with modern scientific accounts Why does the Old Testament contain so much violence How should Christians handle texts that give women a second class status Does the Old Testament contradict itself Why are so many Psalms filled with anger and sorrow What should we make of texts that portray God as filled with wrath Combining pastoral insight biblical scholarship and a healthy dose of humility gifted teacher and communicator Matthew Schlimm explores perennial theological questions raised by the Old Testament He provides strategies for reading and appropriating these sacred texts showing how the Old Testament can shape the lives of Christians today and helping them appreciate the Old Testament as a friend in faith

Rhetorical Machines John Jones, Lavinia Hirsu, 2019-07-02 A landmark volume that explores the interconnected nature of technologies and rhetorical practice Rhetorical Machines addresses new approaches to studying computational processes within the growing field of digital rhetoric While computational code is often seen as value neutral and mechanical this volume explores the underlying and often unexamined modes of persuasion this code engages In so doing it argues that computation is in fact rife with the values of those who create it and thus has powerful ethical and moral implications From Socrates's critique of writing in Plato's Phaedrus to emerging new media and internet culture the scholars assembled here provide insight into how computation and rhetoric work together to produce social and cultural effects This multidisciplinary volume features contributions from scholar practitioners across the fields of rhetoric computer science and writing studies It is divided into four main sections Emergent Machines examines how technologies and algorithms are framed and entangled in rhetorical processes Operational Codes explores how computational processes are used to achieve rhetorical ends Ethical Decisions and Moral Protocols considers the ethical implications involved in designing software and that software's impact on computational culture and the final section includes two scholars' responses to the preceding chapters Three of the sections are prefaced by brief conversations with chatbots autonomous computational agents addressing some of the primary questions raised in each section At the heart of these essays is a call for emerging and established scholars in a vast array of fields to reach interdisciplinary understandings of human machine interactions This innovative work will be valuable to scholars and students in a variety of disciplines including but not limited to rhetoric computer science writing studies and the digital humanities
