Vogel's Textbook of Quantitative Chemical

Analysis Arthur Israel Vogel, John Mendham, 2000 This text provides a basis for the teaching learning and application of analytical chemistry It covers rapidly developing areas with sections on calibration methods and the analysis of variance Experimental design optimization techniques and examples of multivariate analysis are also included

Principles of

Quantitative Chemical Analysis Robert De Levie, 1997 Designed for a sophomore junior course in analytical chemistry or quantitative analysis this text focuses on the quantitative aspects of the discipline using a unified approach Emphasis is placed on developing visual tools for understanding complicated solution equilibria To these ends extensive use is made of graphical methods such as the easily sketched stick diagrams which can be used to guide analytical calculations and takes the guesswork out of numerical approximations Optional spreadsheet exercises are closely integrated with the text and can therefore serve to introduce the student to the use of computers for chemical calculations
