1914 illuminating the role of gender in the construction of national identity during this formative period of French history The popularity of the heroic cult at this time was in part the result of defeat in the Franco Prussian War in 1870 as well as a reaction to changing gender roles and collective guilt about the egoism and selfishness of modern consumer culture The author analyzes representations of historical figures in the theater focusing on Cyrano de Bergerac Napoleon and Joan of Arc and examines the press coverage of heroes and anti heroes in the Bazar de la Charit fire of 1897 and the Ullmo spy case of 1907

Tradition and Style in the Works of Darius Milhaud 1912-1939 BarbaraL. Kelly,2017-07-05 Described by Maurice Ravel as one of the most considerable talents in French music of his generation Darius Milhaud remains a largely neglected composer This book reappraises his contribution focusing on the emergence of the composer s style until his Jewish background forced his exile to the United States on the eve of the World War II The period 1912 1939 spans the crucial years that mark the development of Milhaud s mature style It was also during this time that he published his most important writings on contemporary music and its relationship to the past Barbara Kelly discusses the extent to which Milhaud s complex views on the idea of a French national musical heritage relate to his own practice and considers how his works reflect the balance between innovation and tradition Drawing comparisons with contemporaries such as Debussy Satie Schoenberg Stravinsky and Poulenc the book argues that the rhythmic vitality of Milhaud s style and his modal approach within a polytonal context mark him out as an original and distinctive composer

Contesting Sacrifice Ivan Strenski,2002-07 From the counter reformation

through the twentieth century the notion of sacrifice has played a key role in French culture and nationalist politics Ivan Strenski traces the history of sacrificial thought in France starting from its origins in Roman Catholic theology. Throughout he highlights not just the dominant discourse on sacrifice but also the many competing conceptions that contested it. Strenski suggests that the annihilating spirituality rooted in the Catholic model of Eucharistic sacrifice persuaded the judges in the Dreyfus Case to overlook or play down his possible innocence because a scapegoat was needed to expiate the sins of France and save its army from disgrace. Strenski also suggests that the French army's strategy in World War I French fascism and debates over public education and civic morals during the Third Republic all owe much to Catholic theology of sacrifice and Protestant reinterpretations of it. Pointing out that every major theorist of sacrifice is French including Bataille, Durkheim, Girard, Hubert and Mauss, Strenski argues that we cannot fully understand their work without first taking into account the deep roots of sacrificial thought in French history.

Framing France Richard Thomson, 1998. Landscape painting in France between 1870 and 1914 was a battleground fought over by avant garde and conservative artists as well as the Left and Right in French politics. This collection of essays by distinguished contributors throws light on how representing the land became an evolutionary vehicle not only for art but society as well. 70 illustrations.

Printed Matters Malcolm Gee, Tim Kirk, 2017-10-05. This title was first published in 2002. Since the invention of printing in the mid fifteenth century the production, distribution and consumption of printed matter have been the principal means through which new ideas and representations have been spread. In recent times cultural historians have taken a growing interest in the previously somewhat isolated field of book history, shifting the study of printing and publishing into the centre of historical concern. This study of print and printing culture has naturally led historians to a concern with its urban context. The urban environment was fundamental to the development of printing from the outset since it was in towns that the necessary combination of technical and entrepreneurial competencies were located and where a growing demand for printed texts was to be found. Print permeated the urban experience at every level and formed the chief means by which its ideas, values and beliefs were exported to the rest of society. In this way print promoted the broader urbanisation of society by spreading urban attitudes and ideas beyond the limits of the city. It is with the urban cultural environment that this volume is primarily concerned, underlining the centrality of printing and publishing to the understanding of urban culture. Focusing particularly on post-1800 France and Germany, it considers a wide range of printed matter and engages with a number of recurrent historical issues such as the role of printing in urban economies, the construction of metropolitan identities and the testing of moral boundaries.
