**On Yankee Station** John B. Nichols, 2013-03-11 Combining vivid personal narrative with historical and operational analyses this book takes a candid look at U S naval airpower in the Vietnam War Coauthors John Nichols a fighter pilot in the war and Barrett Tillman an award winning aviation historian make full use of their extensive knowledge of the subject to detail the ways in which airpower was employed in the years prior to the fall of Saigon Confronting the conventional belief that airpower failed in Vietnam they show that when applied correctly airpower was effective but because it was often misunderstood and misapplied the end results were catastrophic Their book offers a compelling view of what it was like to fly from Yankee Station between 1964 and 1973 and important lessons for future conflicts At the same time it adds important facts to the permanent war record Following an analysis of the state of carrier aviation in 1964 and a definition of the rules of engagement it describes the tactics used in strike warfare the airborne and surface threats electronic countermeasures and search and rescue It also examines the influence of political decisions on the conduct of the war and the changing nature of the Communist opposition Appendixes provide useful statistical data on carrier deployments combat sorties and aircraft losses

**The Naval Air War in Vietnam** Peter B. Mersky, Norman Polmar, 1986 Provides a detailed account of naval aviation in Vietnam including personal stories of pilots

**Naval Air War** U. S. Department Navy, 2016-10-28 Naval Air War The Rolling Thunder Campaign is the sixth monograph in the series The U S Navy and the Vietnam War It covers aircraft carrier activity during one of the longest sustained aerial bombing campaigns in history And it would be a failure The U S Navy proved essential to the conduct of Rolling Thunder and by capitalizing on the inherent flexibility and mobility of naval forces the Seventh Fleet operated with impunity for three years off the coast of North Vietnam The success with which the Navy executed the later Operation Linebacker campaign against North Vietnam in 1972 revealed how much the service had learned from and exploited the Rolling Thunder experience of 1965 1968

**Over the Beach** Zalin Grant, 2013-08-12 The Right Stuff without the hype Yeager without the ego Washington Post Book World While the jet jockey competitiveness the undercurrent of fear the victories and foul ups of jet sweeps have been described many times few such chronicles have done it so grippingly and with such a ring of accuracy Mr Grant explores the emotions felt not only by the men in battle but by the wives and others left behind and the questions the war raised in their minds To put in larger context the war s impact on individual participants the author periodically reviews the high level struggles over how to fight the air war What is most impressive is to find an analysis so clearly stated so seemingly on track in locating the weak spots in the policies of various political and military officials Written in a straightforward yet stylish prose Over the Beach carries tremendous conviction

Richard Witkin New York Times Book Review

**One Hundred Years of U.S. Navy Air Power** Douglas V

Smith, 2010-10-15 Published to coincide with the centennial celebration of U S Navy Aviation this book chronicles Navy aviation from its earliest days before the Navy s first aircraft carrier joined the fleet through the modern jet era marked by

the introduction of the F 18 Hornet It tells how naval aviation got its start profiles its pioneers and explains the early bureaucracy that fostered and sometimes inhibited its growth The book then turns to the refinement of carrier aviation doctrine and tactics and the rapid development of aircraft and carriers highlighting the transition from propeller driven aircraft to swept wing jets in the period after WW II Land based Navy aircraft rotary wing aircraft and rigid airships and balloons are also considered in this sweeping tribute Naval Air War Norman Polmar,Edward J. **Gradual Failure: The Air War Over North Vietnam 1965-1966 [Illustrated Edition]** Jacob Van Staaveren,2015-11-06 Includes over 100 maps plans and illustrations The United States Air Force reached its nadir during the opening two years of the Rolling Thunder air campaign in North Vietnam Never had the Air Force operated with so many restraints and to so little effect These pages are painful but necessary reading for all who care about the nation s military power Jacob Van Staaveren wrote this book in the 1970s near the end of his distinguished government service which began during the occupation of Japan the University of Washington Press published his book on that experience in 1995 He was an Air Force historian in Korea during the Korean War and he began to write about the Vietnam War while it was still being fought His volume on the air war in Laos was declassified and published in 1993 Now this volume on the air war in North Vietnam has also been declassified and is being published for the first time Although he retired to McMinnville Oregon a number of years ago we asked him to review the manuscript and make any changes that seemed warranted For the most part this is the book he wrote soon after the war Readers of this volume will also want to read the sequel Wayne Thompson s **To Hanoi and Back The U S Air Force and North Vietnam 1966 1973** which tells the more encouraging story of how the Air Force employed airpower to far greater effect using a combination of better doctrine tactics technology and training **Air War Vietnam** Martin W Bowman,2023-09-30 Showcasing specific aircraft and highlighting significant missions illuminates the skills and emotions of the men who flew the machines Bowman does an excellent job recounting stories about battles in the air and decision making on the ground The VVA Veteran Martin Bowman s revealing narrative of the aerial conflict in South East Asia 1965 1972 which had its beginnings in 1 November 1955 engulfed Vi tnam Laos and Cambodia and only ended with the fall of S i g n on 30 April 1975 has resulted from decades of painstaking fact finding as well as detailed correspondence with surviving aircrew incorporating a wealth of first hand accounts some never told before supported by dozens of rare and unusual photographs Together they describe in adrenalin pumping accuracy the furious aerial battles of a long suffering and bitter war in South East Asia and in particular the frontline action in the skies over Vietnam that will keep readers on the edge of their seats They too will find a new and useful perspective on a conflict that cost the Americans 58 022 dead and brought the USA worldwide condemnation for its role in Southeast Asia Nearly 2 500 Americans remained missing This work serves as a tribute to the courageous pilots who flew the F 104 Starfighter in the Widowmakers war and B 52 bomber crews on Arc Light Linebacker II strikes and the eleven days of Christmas which ultimately ended the aerial

campaign against North Vietnam and as well strike aircraft such as the USAF F 4 Phantom and the F 105 Thunder and the US Navy carrier borne jet and propeller driven strike aircraft and the Americans sworn enemy the North Vietnamese MiG fighters feature large from Rolling Thunder onwards. Equally the Hueys and Chinooks and other notable work horses that participated on combat assaults or Ash Trash missions and transports like the C 130 Hercules Bird C 123 Provider Caribou and Vietnamese C 47 the Haulers On Call that performed sterling service during the gruelling air campaign are not forgotten either. Here at first hand are their stories which also include some of the less publicised American forces like the pilots and crewmen who flew the Bird Dogs and all manner of helicopters as well as the largely forgotten Australian and New Zealand Air Force units and the Anzac Battalions whose valuable contributions are too often overlooked. So too is the cost in human misery death and destruction.

**Air Warfare in the Missile Age** Lon O. Nordeen, 2010-07-06 Lon O Nordeen has completely updated his 1985 chronicle of military aviation's evolving role in warfare now covering the major conflicts of the past four decades. He presents the historical and political background of each conflict and includes in depth discussions of the aircraft weapons tactics training new systems and other factors that influenced the outcome of each war. New and existing chapters have been enhanced with information based on recently declassified material especially regarding Vietnam and new sources in Egypt Israel and the former Soviet Union. As smart bombs have become more successful in reducing the risks for pilots and frontline troops air missile warfare has become the central player in military conflicts. **Air Warfare in the Missile Age Second Edition** is a valuable resource for understanding the evolution of modern air warfare.

Gradual failure : the air war over North Vietnam 1965-1966 Jacob Van Staaveren, 2002 Of the many facets of the American war in Southeast Asia debated by U S authorities in Washington by the military services and the public none has proved more controversial than the air war against North Vietnam. The air war's inauguration with the nickname Rolling Thunder followed an eleven year American effort to induce communist North Vietnam to sign a peace treaty without openly attacking its territory. Thus Rolling Thunder was a new military program in what had been a relatively low key attempt by the United States to win the war within South Vietnam against insurgent communist Viet Cong forces aided and abetted by the north. The present volume covers the first phase of the Rolling Thunder campaign from March 1965 to late 1966. It begins with a description of the planning and execution of two initial limited air strikes nicknamed Flaming Dart I and II. The Flaming Dart strikes were carried out against North Vietnam in February 1965 as the precursors to a regular albeit limited Rolling Thunder air program launched the following month. Before proceeding with an account of Rolling Thunder its roots are traced in the events that compelled the United States to adopt an anti communist containment policy in Southeast Asia after the defeat of French forces by the communist Vietnamese in May 1954.

**Ready Seapower** Edward J. Marolda, 2012-05-08 No naval command has done more than the Seventh Fleet to defend and promote American interests in Asia. This fighting fleet was in the forefront of U S forces involved in the Pacific campaigns of World War II and the conflicts in Korea Vietnam and the

Arabian Gulf In the last half of the 20th century and the first decade of the 21st century the Seventh Fleet has stood as a bulwark against aggression and partnered with America's Asian allies to maintain peace and stability in this vital region Whether combating conventional forces guerrillas insurgents pirates or terrorists Seventh Fleet Sailors have routinely displayed exceptional courage and dedication serving also as ambassadors for America's core values of freedom democracy free market enterprise and respect for human rights

**Naval War College Review**, 1990 *The Vietnam War on Trial* Michal R. Belknap, 2002 Unfolding the Calley case step by step Belknap shows how our system of military justice actually works His dramatic reenactment takes readers through every stage of the trial from pre trial investigations to actual courtroom exchanges among prosecutors defenders witnesses and judges In the process he reveals how a court martial conducted within the public eye transformed a purely legal proceeding into a political debate about the conduct of the war Calley

Military Justice in Vietnam William Thomas Allison, 2007 A concise look at how military justice during the Vietnam War served the dual purpose of punishing U.S. soldiers' crimes and infractions while also serving the important role of promoting core American values democracy and rule of law to the Vietnamese

**American Airpower Strategy in Korea, 1950-1953** Conrad C. Crane, 2000 The Korean War was the first armed engagement for the newly formed U.S. Air Force but far from the type of conflict it expected or wanted to fight As the first air war of the nuclear age it posed a major challenge to the service to define and successfully carry out its mission by stretching the constraints of limited war while avoiding the excesses of total war Conrad Crane analyzes both the successes and failures of the air force in Korea offering a balanced treatment of how the air war in Korea actually unfolded He examines the Air Force's contention that it could play a decisive role in a non nuclear regional war but shows that the fledgling service was held to unrealistically high expectations based on airpower's performance in World War II despite being constrained by the limited nature of the Korean conflict Crane exposes the tensions and rivalries between services showing that emphasis on strategic bombing came at the expense of air support for ground troops and he tells how interactions between army and air

force generals shaped the air force's mission and strategy. He also addresses misunderstandings about plans to use nuclear, biological, and chemical weapons in the war and includes new information from pilot correspondence about the informal policy of hot pursuit over the Yalu that existed at the end of the war. The book considers not only the actual air effort in Korea but also its ramifications. The air force doubled in size during the war and used that growth to secure its position in the defense establishment but it wagered its future on its ability to deliver nuclear weapons in a high intensity conflict, a position that left it unprepared to fight the next limited war in Vietnam. As America observes the fiftieth anniversary of its initial engagement in Korea, Crane's book is an important reminder of the lessons learned there. And as airpower continues to be a cornerstone of American defense, this examination of its uses in Korea provides new insights about the air force's capabilities and limitations.
