**LOCKED OUT!** James Bennett,2016-12-06 A Civil Rights Story about Massive Resistance and School Closures in the South Based on actual events The high school was closed to resist being integrated perhaps forever and the town was split down the middle into two opposing camps This is the historical backdrop for this coming of age novel about 2 young boys one white one black growing up in a small southern town during the 1950s when school integration collided with Massive Resistance and life in the peaceful little town was thrown into chaos Based on actual events that happened between 1956 and 1960 in Front Royal Virginia this compelling story reveals the often overlooked depth of the human side of the story The action is depicted through a collection of snap shots of whites and blacks which creates a wide angle montage Their stories give clarity and dimension to the historical events The story combines strong characters heartwarming scenes

psychological tension humor 1950s nostalgia and even a murder mystery      **Liberating Learning** Patrick Derham,Michael Worton,2010-03-17 A case for liberating learning Enhancing students quality of life through education in the classroom and beyond Throughout the history of our civilisation education has been seen by philosophers national leaders and educators as essential for social cohesion and economic development However there is a tension between the proper interest of governments in ensuring that education prepares young people to be effective citizens and the desire of educators to ensure that students maintain individuality and a rich learning experience While it is important to have comparable standards within and between countries when it comes to issues of curriculum standardisation risks constraint and over regulation In education the liberal tradition places great emphasis on individual freedom moving well beyond freedom from and rather positioning and promoting education as freedom to It is this commitment to education s emancipatory potential that underpins all of the essays in this book While exploring the impact of globalisation and emerging technologies on the teaching and learning practices of schools and universities Liberating Learning presents a variety of pioneering initiatives advocated by seminal thinkers and practitioners with a series of commentaries on where education is and where it is going There are three key areas of focus the curriculum pedagogy and the role of secondary education in widening participation in higher education Collectively the perspectives outlined here consider how we might transform our vision of education as authentically enabling and emancipatory into a reality for all young people In a climate where the imperative for sharing ideas and good practice between distinct educational sectors and between educators and policy makers is crucial our hope is that this collection will serve as catalyst for further debate on how to liberate learning and broaden participation
