Patrick Geary is alarmed by the rapid progression of nationalist movements in [Europe](#) and the popular support such movements receive. Historians bear the brunt of his displeasure because they are responsible, in his mind, for the re-emergence of these divisive movements. The result of such nationalist tendencies, in Geary's estimation, is a "deep crisis of identity" (3). Early medievalists often find themselves at the center of an explosive issue because "no other period of history is as obscure and obscured by nationalist and chauvinist scholarship" (9). Geary is emphatic in his declarations that medieval scholarship made history available to ideologues to distort and bend to promote their own agendas. Though the error was inadvertent, Geary feels uniquely qualified to correct centuries of misguided history.

In *The Myth of Nations: The Medieval Origins of Europe*, Geary argues that nationalism, as perceived by most people around the world, is a myth. Modern day Germans, Serbs, or any other "ethnic" people share

The Myth of Nations Patrick J. Geary, 2002 Modern day Europeans by the millions proudly trace back their national identities to the Celts Franks Gauls Goths Huns or Serbs or some combination of the various peoples who inhabited traversed or pillaged their continent more than a thousand years ago According to Patrick Geary this is historical nonsense The idea that national character is fixed for all time in a simpler distant past is groundless he argues in this unflinching reconsideration of European nationhood Few of the peoples that many Europeans honor as sharing their sense of nation had comparably homogeneous identities even the Huns he points out were firmly united only under Attila's ten year reign Geary dismantles the nationalist myths about how the nations of Europe were born He contrasts the myths with the actual history of Europe's transformation between the fourth and ninth centuries the period of grand migrations that nationalists hold dear The nationalist sentiments today increasingly taken for granted in Europe emerged he argues only in the nineteenth century Ironically this phenomenon was kept alive not just by responsive populations but by complicit scholars Ultimately Geary concludes the actual formation of European peoples must be seen as an extended process that began in antiquity and continues in the present The resulting image is a challenge to those who anchor contemporary antagonisms in ancient myths to those who claim that immigration and tolerance toward minorities despoil nationhood As Geary shows such ideologues whether Le Pens who champion the French people born with the baptism of Clovis in 496 or Milosevics who cite early Serbian history to claim rebellious regions know their myths but not their history

**Power and the Nation in European History** Len Scales, Oliver Zimmer, 2005-06-09 Few would doubt the central importance of the nation in the making and unmaking of modern political communities The long history of the nation as a concept and as a name for various sorts of imagined community likewise commands such acceptance But when did the nation first become a fundamental political factor This is a question which has been and continues to be far more sharply contested A deep rift still separates modernist perspectives which view the political nation as a phenomenon limited to modern industrialised societies from the views of scholars concerned with the pre industrial world who insist often vehemently that nations were central to
