The Myths Of Information Technology And Postindustrial Culture:

The Myths of Information Kathleen M. Woodward, 1980 **The Myths of Technology** Judith Burnett, Peter Senker, Kathy Walker, 2009 This book questions whether technologies are the rational tangible scientific forward thinking neutral objects they are so often perceived to be exploring instead how powerful mythic ideas about technologies drive our social understanding and our expectations of them Against a rising tide of information we encounter significant technological scientific and medical advances which promise to create an educated humane and equal world This book explores that promise deconstructing technologies to conclude that though they do afford us significant and empowering advances they remain largely cloaked in mystery and often promise more than they can deliver Contributors from diverse intellectual backgrounds and political and epistemological stances spanning sociology and psychosocial investigations innovation studies and scientists combine philosophical inquiry and empirical case studies to create a book which is at once provocative innovative and exciting in the challenges it poses **The Post-Modern and the Post-Industrial** Margaret A. Rose, 1991-06-28 The first book to provide a critical survey of the many different uses made of the term post modern across a number of different disciplines **The Myths of Information: Technology and Postindustrial Culture** Kathleen Woodward, 1980 Qualitative Data Analysis Carol Grbich, 2012-11-19 In this fully updated and expanded second edition Carol Grbich provides a guide through current issues in the analysis of qualitative data Packed with detailed examples a glossary further reading lists and a section on writing up this book is exactly what you need to get you started in qualitative research The new edition covers analytical approaches including grounded theory classical existential and hermeneutic phenomenology feminist research including memory work classical auto and cyberethnography as well as ethnodrama content narrative conversation and discourse analysis visual interpretation semiotic structural and poststructural analyses A one stop shop for students new to qualitative data analysis **Hope in the Thought of Jacques Ellul** Lawrence J. Terlizese, 2005-10-30 Hope expresses more than an area of concentration in Ellul s thought it is the central idea that binds his disparate elements together Ellul believed that at this moment of history the world since 1945 hope must preoccupy our thinking and lives To understand hope we must first comprehend its absence This entails discerning what causes the absence of hope namely the world s embrace of technique and the abandonment of God Ellul also rejected these as a positive affirmation He wanted to make a firm distinction between reality and truth He affirmed modern abandonment as a realistic fact as an accurate analysis of the present condition not as an affirmation of the truth Hope is truth in Jesus Christ but truth must be asserted against these harsh facts He used facts to incite hope in believers to shake their complacency and to realize their actual condition in the world The idea of hope in the thought of Jacques Ellul can only be properly understood in light of dialectic struggle between negatives which amount to factual representations of the modern world and positives through which hope exerts itself in the face of these facts From this tension will issue personal resolve Technique has brought the

world to great collective heights and achievements but this has come at the expense of personal ends and meaning Ellul attempted to bridge this gap by asserting individual meaning against the aggregated progress of technique without destroying the gains made by collective advance This represents the central dilemma in Ellul's thought how does one maintain meaning and personal aims in a world founded on corporate necessity from the Introduction What Does It Mean to Grow Old? Thomas R. Cole,1987-08 In What Does It Mean to Grow Old essayists come to grips as best they can with the phenomenon of an America that is about to become the Old Country They have been drawn from every relevant discipline gerontology social medicine politics health anthropology ethics law and asked to speak their mind Most of them write extremely well and their sharply individual voices are heard **The Human Science of Communicology** Richard L. Lanigan,1992 Communicology is the study of human discourse in all of its forms ranging from human gesture and speech to art and television Commuicology also represents the dominant qualitative research paradigm in the discipline of human communication especially in the applied areas of mass communication philosophy of communication and speech communication Lanigan's work offers the bold and original thesis that Michel Foucault's thematic study of the discourse of desire and power is an elaboration of the problematic discourse explicated in Maurice Merleau Ponty's interrogation of freedom and terror Various chapters cover such topics as art versus science culture and communication modernity versus postmodernity feminism versus humanism research methodology and the capta versus data distinction for research validity Actual examples of research cover the aesthetics of painting and sculpture radio and television rhetorical criticism of oral and written texts and the East West perspective on cross cultural encounter all using the approach of semiotic phenomenology Two special features of this book make it useful for both teacher and scholar alike First Lanigan provides an encyclopedic dictionary that illustrates and defines the theory and method of the human sciences in general and the discipline of communicology in particular Used for several years by teachers in a number of universities this dictionary had already become a classic among students before its publication here Second Lanigan analyzes and illustrates what has been missing for years in the study of Foucault's work a definition with appropriate illustrative figures and tables of Foucault's method of archaeology and genealogy criticism for research in the human sciences especially in the study of human discourse **Technology and Culture** ,1982 The Media Society Ross Allan Eaman,1987 Measuring the progress and results of diversity initiatives is a key strategic requirement to demonstrate its contribution to organizational performance Diversity executives professionals and managers know they must begin to show how diversity is linked to the bottom line in hard numbers or they will have difficulty maintaining funds gaining support and obtaining resources to generate progress **The Politics of the New World Information and Communications Order** Joon-Mann Kang,1988 Nature, Technology, and Society Victor C. Ferkiss,1993 *Telecommunications Trade Policy* ,1986 **TELEMATICS AND INFORMATICS** INDU B. SINGH,1984 The Development of an American Mass Culture Critique, 1910-1960 Paul R.

Gorman,1990 **The World as Information** Robert Abbott,1999 This book takes a very broad view of information and considers it as a phenomenon in its own right rather than the technology for handling it It is very much concerned with the meaning of information and what we as individuals do with it *Changing Policies, Changing Teachers* Stephen Walker,Len Barton,1987 *Definitive Statements* ,1986 *Film Culture and Kulturfilm* Barry A. Fulks,1982 **44th FID Conference and Congress** International Federation for Information and Documentation,1988
