sections The first introduces the changing security environment facing the United States and by extension the U S Navy The articles examine both the external position of the nation and the emerging internal political and institutional contexts that constrain military and naval policies and decision making The second part looks specifically at the roles and missions of the Navy at the beginning of the twenty first century Its articles cover both long standing issues such as forward presence and the new missions the Navy has assumed in recent years from projecting power far inland to providing theater and national missile defense especially against opponents armed with nuclear biological or chemical weapons The last part of the volume concentrates on military and naval transformation The articles in this section provide some perspective on perhaps even ballast for the claims of proponents of the revolution in military affairs Finally I supply a conclusion reviewing the main themes of the articles and the avenues to which they point The Naval War College Review remains one of the premier journals dedicated to publishing articles and essays with a naval and maritime focus The chapters in the volume provide many of the intellectual building blocks for a maritime strategy designed to maintain American primacy and if mandated by political leaderships support a liberal empire that helps protect and spread the ideals of democracy and markets The Navy s role will be arduous and the need for continuous adjustments to the prevailing international security environment great By reading or rereading the chapters that follow specialists and nonspecialists alike can gain greater insights into the challenges ahead
