## **The Nationwide Television Studies:**

*The Nationwide Television Studies* Charlotte Brunsdon, David Morley, 2005-07-15 This book brings together for the first time David Morley and Charlotte Brunsdon's classic texts *Everyday Television* and *The Nationwide Audience*. Originally published in 1978 and 1980 these two research projects combine innovative textual readings and audience analysis of the BBC's current affairs programme *Nationwide*. In a specially written introduction the authors trace the history of the original *Nationwide* project and clarify the origins of the two books.

**Television Studies** Jonathan Gray, Amanda D. Lotz, 2019-01-15 *Television Studies* provides an overview of the origins, central ideas and intellectual traditions of this exciting field. What have been the primary areas of inquiry in television studies? Why and how did these areas develop? How have scholars studied them? How are they developing? What have been the discipline's key works? This book answers these questions by tracing the history of television studies right up to the digital present, surveying emerging scholarship and addressing new questions about the field's relationship with the digital. The second edition includes an examination of how internet distributed services such as Netflix have adjusted the stories, industrial practices and audience experience of television. For all those wondering how to study television or even why to study television, this new edition of *Television Studies* will provide a clear and engaging overview of key topics. The book works as a stand-alone introduction and by placing key works in a broader context can also provide an excellent basis for an entire course.

**The Television Studies Reader** Robert Clyde Allen, Annette Hill, 2004 *The Television Studies Reader* brings together key writings in the expanding field of television studies, providing an overview of the discipline and addressing issues of industry, genre, audiences, production and ownership and representation. The Reader charts the ways in which television and television studies are being redefined by new and alternative ways of producing, broadcasting and watching TV, such as cable, satellite and digital broadcasting, home video, internet broadcasting and interactive TV, as well as exploring the recent boom in genres such as reality TV and docu-soaps. It brings together articles from leading international scholars to provide perspectives on television programmes and practices from around the world, acknowledging both television's status as a global medium and the many and varied local contexts of its production and reception. Articles are grouped in seven themed sections, each with an introduction by the editors: Institutions of Television, Spaces of Television, Modes of Television, Making Television, Social Representation on Television, Watching Television, Transforming Television.

**Critical Media Studies** Brian L. Ott, Robert L. Mack, 2009-08-24 *Critical Media Studies* is a state-of-the-art introduction to media studies that demonstrates how to think critically about the power and influence of the media. Provides extensive case study material, including exercises and media labs in each chapter to encourage student participation. Draws on examples from print, broadcast and new media, including advertising, music, film, television, video games and the internet. Accompanied by a website with supplementary material, additional case studies, test banks, PowerPoint slides and a guide for professors.
