## **The New Caithneb:**

**The New Coastal History** David Worthington, 2017-10-17 This book provides a pathway for the New Coastal History Our littorals are all too often the setting for climate change and the political refugee and migration crises that blight our age Yet historians have continued in large part to ignore the space between the sea and the land Through a range of conceptual and thematic chapters this book remedies that Scotland a country where one is never more than fifty miles from saltwater provides a platform as regards the majority of chapters in accounting for and supporting the clusters of scholarship that have begun to gather around the coast The book presents a new approach that is distinct from both terrestrial and maritime history and which helps bring environmental history to the shore Its cross disciplinary perspectives will be of appeal to scholars and students in those fields as well as in the environmental humanities coastal archaeology human geography and anthropology **The New American Cyclopaedia** George Ripley, Charles Anderson Dana, 1862 **Surfing and Modernity**

**in the North of Scotland** Matthew L. McDowell, 2024-09-11 For most people surfing is associated with Hawaii California and Australia with sun sand and scantily clad bodies However after the Second World War surfing also found a more unlikely home the north coast of Scotland In the 1960s and 1970s the first people to surf the Pentland Firth s world class waves braved brutal weather conditions poor or no wetsuits and baffled locals Equally as unlikely as surfing s presence on the north coast was its first permanent community founded amongst workers at a nuclear research facility with a notoriously poor safety record This book discusses the existence and evolution of surfing in the region from the 1960s to the present day It does not however focus just on surfing it also acts as a history of the region itself and examines the possibilities and limits of surfing sport and activities like them being used as a means of reinventing communities This book is therefore a valuable tool for historians sport practitioners and economic policymakers alike what can surfing tell us about the modern Highlands and Islands and indeed contemporary Scotland **The New American Cyclopaedia** Charles Anderson Dana, George Ripley, 1873 **The Book of British Topography** John Parker Anderson, 1881 **Chambers's Encyclopædia**, 1888

**The Annals of Scottish Natural History**, 1892 **Lexical Variation and Attrition in the Scottish Fishing Communities** Robert McColl Millar, 2014-06-04 This book considers various theoretical and methodological issues in relation to a representative sample of fishing communities along Scotland OCOs east coast Can the lexical variation and change found in these communities be perceived as primary evidence **The New History of Orkney** William P. L. Thomson, 2008 For much of its history Orkney had its own language culture and institutions The prehistoric inhabitants created monuments which are unmatched anywhere in Europe and the medieval period saw the magnificent earldom that expressed itself through the Orkneyinga Saga and the building of St Magnus Cathedral in Kirkwall Like Shetland Orkney was heavily influenced by Viking traders and raiders from Scandinavia and for a long period it formed an outlying part of the kingdom of Norway Over 500 years ago however the islands lost their Scandinavian links and since then have had a sometimes difficult

association with mainland Scotland More recent times have seen the use of Orkney as a strategic stronghold during two world wars and the far reaching impact of oil and gas exploitation in the North Sea This classic book covers the whole fascinating story and will be of interest to readers far beyond the rocky shores of Orkney itself
