The New Deal American Youth Ideas Ideals In A Depression Decade:

The New Deal's Forest Army Benjamin F. Alexander, 2018-02-01 How the Civilian Conservation Corps constructed rejuvenated and protected American forests and parks at the height of the Great Depression Propelled by the unprecedented poverty of the Great Depression President Franklin D Roosevelt established an array of massive public works programs designed to provide direct relief to America's poor and unemployed The New Deal's most tangible legacy may be the Civilian Conservation Corps's network of parks national forests scenic roadways and picnic shelters that still mark the country's landscape CCC enrollees most of them unmarried young men lived in camps run by the Army and worked hard for wages most of which they had to send home to their families to preserve America's natural treasures In *The New Deal's Forest Army* Benjamin F Alexander chronicles how the corps came about the process applicants went through to get in and what jobs they actually did He also explains how the camps and the work sites were run how enrollees spent their leisure time and how World War II brought the CCC to its end Connecting the story of the CCC with the Roosevelt administration's larger initiatives Alexander describes how FDR's policies constituted a mixed blessing for African Americans who even while singled out for harsh treatment benefited enough from the New Deal to become an increasingly strong part of the electorate behind the Democratic Party The CCC was the only large scale employment program whose existence FDR foreshadowed in speeches during the 1932 campaign and the dearest to his heart throughout the decade that it lasted Alexander reveals how the work itself left a lasting imprint on the country's terrain as the enrollees planted trees fought forest fires landscaped public parks restored historic battlegrounds and constructed dams and terraces to prevent floods A uniquely detailed exploration of life in the CCC *The New Deal's Forest Army* compellingly demonstrates how one New Deal program changed America and gave birth to both contemporary forestry and the modern environmental movement [The New Deal & American Youth](#) Richard A. Reiman, 1992 When President Franklin Roosevelt formed the National Youth Administration NYA in June 1935 he declared that it would address the most pressing and immediate needs of American young people In this book Richard A Reiman explores the various and sometimes conflicting ways in which the NYA planners and administrators defined those needs and attempted to answer them As Reiman notes the NYA was established to assist the millions of youth who during the Depression years were out of school out of work and ineligible for the New Deal's own Civilian Conservation Corps Contrary to popular belief he argues New Dealers did not envision the NYA primarily as a junior WPA a trigger for civil rights reform or a springboard for the careers of liberal administrators Rather its designers saw it as a reform agency that would advance and protect democracy by countering totalitarian appeals to young people and by equalizing educational opportunities for rich and poor Woven into the successive drafts establishing the NYA these twin purposes united the programs of planners as disparate as Aubrey W Williams Mary McLeod Bethune John Studebaker Eleanor Roosevelt Charles Taussig and FDR himself Like their separate agendas Reiman shows the planners shared concerns for democratic values

were the products of thinking that had arisen during the Progressive Era a time when an awareness of the social effects of child development first occurred During the 1930s fears of fascism and totalitarianism added fuel to these concerns and shaped much of the nature of the NYA's prewar appeal Based on a wide range of sources including NYA related documents at the National Archives and at the Franklin D Roosevelt Library *The New Deal and American Youth* is the first full length study of this important agency By showing how the NYA served as an instrument for realizing so many New Deal ambitions it offers rich insights into both the NYA and the New Deal

Franklin D Roosevelt Congress , Picturing Arizona Katherine G. Morrissey, Kirsten Jensen, 2005-10 The more than one hundred images by well known photographers such as Dorothea Lange and Laura Gilpin as well as by an array of less familiar ones places the work of local Arizonans alongside that of federal photographers both to illuminate the impact of the Depression on the state's distinctive racial and natural landscapes and to show the influence of differing cultural agendas on the photographic record Includes essays by a variety of authors on life in 1930s Arizona and the photographers who documented it

Family Values Isabel Heinemann, 2023-10-04 Clashes over the American family and its values have always implicitly or explicitly addressed issues of gender and highlighted the significance of present and future families to American society This is the insight underpinning Isabel Heinemann's groundbreaking study which traces over the course of the twentieth century debates on the family and its role the relationship between the individual and society and individual decision making rights as well as their denial or curtailment Unpacking these issues in a vivid and innovative analysis the book recounts the prehistory of current conflicts over the family and gender while illuminating the relationship between social change normative shifts and the counter movements spawned in response to them
