Occultism Simplified Willis F. Whitehead,1994 **Occultism Simplified Or the Mystic Thesaurus** Willis F. Whitehead,2016-07-02 An excerpt from the beginning THE MYSTIC THESAURUS We teach by Symbols Truth Symbols of the Cross Symbols and Symbolism The Mystic Zodiac Some Relations of Zodiac Cross and Man EVERYTHING made to represent a thing or thought is a symbol as letters numbers or characters Every art and science has its own appropriate symbols Every calling and profession has the same Symbols are used to designate weights and measures and the Starry Constellations and Planets are all known by their proper signs and symbols Every letter is a symbol and every character representing number is a symbol also Geometry is delineated in symbolic lines and as every possible motion corresponds with these every act of man or movement of planet or star are so many symbols of generic and individual status Symbols are born of necessity and are founded on Nature and her laws They constitute the Language of the Infinite and appeal especially to both mind and eye A familiarity with symbols is as essential to an education as a knowledge of words is to speech And as speech is expressive of thought so are symbols Mystic science art and philosophy have symbols also each containing within itself a soul of divine truth The dedicatory cross on the opposite page one that is original with myself and which appears in a volume of Agrippa Natural Magic is a symbol of the man and of that Occult Philosophy of Geometric Man he strove to teach and for which he is famed for after all it is the human side of his personality his life and writings which most appeal to us A necessary key to the mysteries of this Starry Cross is that majestic Symbol of the Infinite the Zodiac Indeed an understanding of the Zodiacal Symbol on material lines at first lies at the very fountain head of a knowledge of celestial things and that which springs therefrom To these ends we insert the following description *Occultism Simplified* Willis Whitehead,2017-03-29 The mysteries of the Zodiac hidden Kabbalah the meaning of the Agrippian Cross mind radiation and inspiration Astral experiences the Master of the Pentacles the Magic of 142857 the Supreme Law of Love Death and Immortality

Whitehead,2010-04 Many of the earliest books particularly those dating back to the 1900s and before are now extremely scarce and increasingly expensive We are republishing these classic works in affordable high quality modern editions using the original text and artwork **Science & Perception** Michael Weaver,2018-02-18 The

history of science in the West can be traced back almost 2500 years to a time when science religion and the arts all fell under a single discipline the area of study known as Natural Philosophy or Philosophia Naturalis The philosophers of this time period individuals such as Pythagoras Plato and Euclid literally set the stage for much of modern science developing tools that are still used to this day Despite the large swaths of time that have managed to pass instruments such as number and geometry have remained essentially unchanged as evidenced by the continued publication and translation of texts such as Euclid s Elements While many of the tools used by modern science can be traced back to the Platonic and Neoplatonic schools of thought the current scientific world view is more closely aligned with an altogether different school of thinking Philosophers such as Democritus posited that the objects found within the physical world were actually composed of small discrete parts a world view still held by most of the modern world to this day Few people stop to consider that this perspective the atomistic view of the world is in direct contradiction to the principles espoused by Pythagoras and Plato This book provides a modern interpretation for the Platonic model of the Universe by making use of both dialogue and diagrams the same techniques employed by Plato and Euclid more than 2000 years ago to explain their ideas
