The Naturalists Pioneers Of Natural History:

The Naturalists Alan C. Jenkins, 1978 From exploitation superstition and prejudice man's attitude to his environment and the other creatures who inhabit it has changed radically over the past two hundred years That it has done so has resulted largely from the work of the naturalist pioneers which first gradually dispelled ignorance and then replaced it with interest and sympathy This book celebrates these figures evaluates the contribution of zoos and National Parks in the cause of both science and humanity and looks at the varied and beautiful art forms which have arisen as a result of new perspectives and respect for the natural world The natural history of Selborne, and The naturalist's calendar Gilbert White, 1879 **A**

Field Guide to Butterflies of the Greater Yellowstone Ecosystem Diane M. Debinski, James Pritchard, 2002-08-30 Yellowstone and Grand Teton National Parks while mostly noted for grizzly bears elk moose and other large mammals also host a high species diversity of butterflies owing to the ecosystem's vast area of pristine habitat Many of the nearly 120 butterflies described can also be found elsewhere in the Northern Rockies making the book useful beyond the artificial borders of the public lands Illustrated with color plates of each species **A Field Guide to Butterflies of the Greater Yellowstone Ecosystem** also provides basic information on butterfly anatomy and natural history as well as the proper way to catch and release butterflies though with a stern reminder that netting butterflies is not permitted in the national parks

The Selborne Pioneer Ted Dadswell, 2017-03-02 Gilbert White's name is known universally but as Ted Dadswell insists in this book important aspects of his work have frequently been overlooked even by scholarly editors The Selborne naturalist 1720-1793 has been described as a prince of personal observers but a shrewd analytical questioning and comparing was also typical of his natural knowledge Exceptional even in his general aims White studied the behaviour the manners and conversation of his animals and plants He saw moreover that an animal or plant and indeed a parish such as his own was unitary in operation again and again a cause had numerous effects and an effect numerous causes Observation could go forward in circumstances such as these if one was both sharp eyed and patient but how could true investigation be managed How could a particular cause or effect be isolated or tested Here what Dadswell calls White's comparative habit was put to good use Gilbert White was a careful keeper of records and using these comparatively he appealed to controls while examining his living creatures Questioning and testing even the entirely usual White was brought back repeatedly to the notion of adaptability His zoological findings often concerned changed or changing animals or birds and their social and inter personal relationships Today we can seem particularly well placed to appreciate his methods and factual claims our ethologists and ecologists have seemingly corroborated much of what he did And yet just this corroboration renders him the more mysterious To properly assess White as naturalist we must be able to approach him not only scientifically but also historically He hoped for the emergence of teams of behavioural workers but did not try to pre-empt what would be achieved only by such teams and while he saw with his own eyes as his friend John Mulso says he was substantially affected by certain

of his contemporaries and predecessors His journals and notebooks show us the naturalist at work When a perhaps unexpected combination of influences is allowed for his unique activities can be at least partially explained *The Beginnings of Natural History in America* George Brown Goode,1886 **Catalog of the Library of the Academy of Natural Sciences of Philadelphia** Academy of Natural Sciences of Philadelphia. Library,1972 **Canadian Naturalist and Geologist and Proceedings of the Natural History Society of Montreal** ,1883 **Green Imperialism** Richard H. Grove,1996-03-29 The first book to document the origins and early history of environmentalism especially its colonial and global aspects **The Victorian Naturalist** ,1900 **Catalogue of scientific serials of all countries, 1633-1876** Samuel Hubbard Scudder,1879 *The Romance of Victorian Natural History* Lynn L. Merrill,1989 This study focuses on how the enthusiasm for natural history in the nineteenth century produced characteristic ways of conceptualizing and visualizing the world especially the Victorian fascination with particulars as frequently seen in Victorian poetry fiction history and textual studies Arguing for natural history as an influential literary genre Merrill examines the language and recurrent motifs in Victorian and some American natural history texts as well as surveying the works of Philip Henry Gosse Charles Kingsley Hugh Miller and John Burroughs **Catalogue of Scientific Serials of All Countries, Including the Transactions of Learned Societies in the Natural, Physical and Mathematical Sciences, 1633-1876** Samuel Hubbard Scudder,1879 *The Naturalist* ,1880 **Catalogue of Scientific Serials of All Countries** Samuel Hubbard Scudder,1879 The American Naturalist ,1888 Pioneer Life in Kentucky Daniel Drake,Charles Daniel Drake,1870 The History of Natural History Gavin D. R. Bridson,2008 With over 5 300 added references this revised and updated edition is an essential source of information for scientists researchers and enthusiastic amateurs The History of Natural History is one of those key works that should be kept in easy reach of anyone interested in the study of natural history in all its branches *Sustainability and the American Naturalist Tradition* Craig Thomas,2018-03-15 Humanity is failing at solving complex socio ecological problems like global climate change biodiversity loss and population growth The existing sustainable development paradigm and its reliance on trade offs between the three pillars of environment economics and equity is not robust enough to maintain global carrying capacity In this timely intervention Thomas argues that the holistic and transdisciplinary thinking of four iconic American naturalists Henry David Thoreau Aldo Leopold Rachel Carson and Edward O Wilson can instead help to solve our biggest twenty first century challenges by synthesizing values from four eras of cultural and environmental history *The Spectator* ,1899 *The Midland Naturalist* ,1883
