**The New Geography of Global Income Inequality** Glenn Firebaugh, 2009-07 The surprising finding of this book is that contrary to conventional wisdom global income inequality is decreasing Critics of globalization and others maintain that the spread of consumer capitalism is dramatically polarizing the worldwide distribution of income But as the demographer Glenn Firebaugh carefully shows income inequality for the world peaked in the late twentieth century and is now heading downward because of declining income inequality across nations Furthermore as income inequality declines across nations it is rising within nations though not as rapidly as it is declining across nations Firebaugh claims that this historic transition represents a new geography of global income inequality in the twenty first century This book documents the new geography describes its causes and explains why other analysts have missed one of the defining features of our era a transition in inequality that is reducing the importance of where a person is born in determining his or her future well being **The Yale Journal of International Law** ,2004 *The Upside of Down* Thomas Homer-Dixon, 2006 Publisher description *The new geography of global income inequality* ,2004 **Journal of Economic Literature** ,2005 **The New Geography of Jobs** Enrico Moretti, 2024-03-19 A timely and smart discussion of how different cities and regions have made a changing economy work for them and how policymakers can learn from that Barack Obama We re used to thinking of the United States in opposing terms red versus blue haves versus have nots But today there are three Americas At one extreme are the brain hubs cities like San Francisco Boston and Durham with workers who are among the most productive creative and best paid on the planet At the other extreme are former manufacturing capitals which are rapidly losing jobs and residents The rest of America could go either way For the past thirty years the three Americas have been growing apart at an accelerating rate This divergence is one of the most important developments in the history of the United States But the winners and losers aren t necessarily who you d expect Enrico Moretti s groundbreaking research shows that you don t have to be a scientist or an engineer to thrive in one of the brain hubs Taxi drivers teachers nurses and other local service jobs are created at a ratio of five to one in the brain hubs raising salaries and standard of living for all Dealing with this split supporting growth in the hubs while arresting the decline elsewhere is the challenge of the century and *The New Geography of Jobs* lights the way Brilliant Forbes Mr Moretti says the data support the argument that technology innovators are one of the most important engines of job creation in the US Jessica E Vascellaro Wall Street Journal Excellent The National Review A clear and insightful account of the economic forces that are shaping America The New Republic [Asian Journal of Social Science](#) ,2007 *International Bibliography of Book Reviews of Scholarly Literature Chiefly in the Fields of Arts and Humanities and the Social Sciences* ,2007 **Annual Review of Sociology** Individuals, 2005-08 The 17 articles of this collection present the current state of research on various questions in the field written by scholars at American universities The collection begins with an overview of the work and career of James S Coleman d 1995 by Peter V Marsden sociology Harvard U A sampling of
