Difficult and Severe Asthma in Children Andrew Bush, Giorgio Piacentini, Francesca Santamaria, Nicola Ullmann, Renato Cutrera, 2019-09-23 Globally severe asthma is defined by the WHO as either A untreated severe asthma B difficult to treat severe asthma and C treatment resistant severe asthma Untreated severe asthma is a political problem the children do not have access to the basic tools for asthma management and when this is corrected asthma outcomes are transformed The problem in difficult to treat severe asthma is not the airway disease but co morbidities and behavioral factors This is the group in which there are most asthma deaths underscoring that severe asthma cannot be solely defined by levels of prescribed therapy Treatment resistant severe asthma is rare and challenging and the problem is the airway pathology These children require new and innovative therapies
