**The European Nitrogen Assessment** Mark A. Sutton, Clare M. Howard, Jan Willem Erisman, Gilles Billen, Albert Bleeker, Peringe Grennfelt, Hans van Grinsven, Bruna Grizzetti, 2011-04-14 Presenting the first continental scale assessment of reactive nitrogen in the environment this book sets the related environmental problems in context by providing a multidisciplinary introduction to the nitrogen cycle processes Issues of upscaling from farm plot and city to national and continental scales are addressed in detail with emphasis on opportunities for better management at local to global levels The five key societal threats posed by reactive nitrogen are assessed providing a framework for joined up management of the nitrogen cycle in Europe including the first cost benefit analysis for different reactive nitrogen forms and future scenarios Incorporating comprehensive maps a handy technical synopsis and a summary for policy makers this landmark volume is an essential reference for academic researchers across a wide range of disciplines as well as stakeholders and policy makers It is also a valuable tool in communicating the key environmental issues and future challenges to the wider public

*Whither Globalization?* James H. Mittelman, 2004-10-21 Globalization is usually said to be about markets power and culture This innovative book goes further arguing that globalization may also be understood as a way of knowing and representing the world Mittelman debunks several prevalent myths about globalization and anti globalization presenting alternatives to this force and indicating the prospects for a new common sense about future world order Drawing on considerable original research this book shows how globalization itself and globalization studies have changed since 9 11 Compact and accessible *Whither Globalization* is a major contribution to the study of globalization by one

of the leading scholars in the field and is essential reading for students of international relations and international political economy

**The California Nitrogen Assessment** Thomas P. Tomich, 2016-06-14 Nitrogen is indispensable to all life on Earth. However, humans now dominate the nitrogen cycle and nitrogen emissions from human activity have real costs: water and air pollution, climate change, and detrimental effects on human health, biodiversity, and natural habitats. Too little nitrogen limits ecosystem processes, while too much nitrogen transforms ecosystems profoundly. The California Nitrogen Assessment is the first comprehensive account of nitrogen flows, practices, and policies for California, encompassing all nitrogen flows, not just those associated with agriculture and their impacts on ecosystem services and human wellbeing. How California handles nitrogen issues will be of interest nationally and internationally, and the goal of the assessment is to link science with action and to produce information that affects both future policy and solutions for addressing nitrogen pollution. This book also provides a model for application of integrated ecosystem assessment methods at regional and state/subnational levels.
