Operating Manual Audi A4:

Environmental Information in Instructions for Use of Consumer Products Ari Nissinen, 2005-03-11 The European Union has highlighted the issue of environmentally sound use of products in the context of Integrated Product Policy IPP. Accordingly, consumers should have easy access to understandable, relevant, and credible environmental information. Information about product characteristics is available in different forms and sources, but in many cases, relevant environmental information is not available on the product itself. The study described in this report was initiated in order to produce information on the state of user instructions regarding environmental information. User manuals of passenger cars and refrigerators were focused on examining the advice which could diminish the harmful environmental effects of the use of these products. Other studied products included such durable products as textiles and furniture as well as such consumables as cleaning chemicals and recyclable paper products. The study raised many ideas about actions that could promote the status and eco-development of instructions for use.

Exploring Operations Research with R Jim Duggan, 2024-05-21 Exploring Operations Research with R shows how the R programming language can be a valuable tool and way of thinking which can be successfully applied to the field of operations research. OR This approach is centred on the idea of the future OR professional as someone who can combine knowledge of key OR techniques e.g. simulation, linear programming, data science, and network science with an understanding of R including tools for data representation, manipulation, and analysis. The core aim of the book is to provide a self-contained introduction to R, both Base R and the tidyverse, and show how this knowledge can be applied to a range of OR challenges in the domains of public health, infectious disease, and energy generation, and thus provide a platform to develop actionable insights to support decision making. Features: Can serve as a primary textbook for a comprehensive course in R with applications in OR. Suitable for postgraduate students in OR and data science with a focus on the computational perspective of OR. The text will also be of interest to professional OR practitioners as part of their continuing professional development. Linked to a Github repository including code, solutions, data sets, and other ancillary material.
