Interactional Approach to Cinematic Discourse Neda Chepinchikj, 2022-07-19 This book analyses and describes a segment of Woody Allen's cinematic discourse focusing specifically on the performed or diegetic interactions between actors in various roles in some of his films It is a case study of Woody Allen's cinematic discourse encompassing the on screen performed interaction in the films at the level of the story world The analysis focuses on speech film dialogues in both its verbal and prosodic forms as well as non verbal types of interaction including gaze and gesture taking a social interactional approach and using multimodal conversation analysis as a theoretical framework and

analytical tool The texts under study are segments from five films by Woody Allen and the analysed interactions take place between male and female interactants which allows further examination of on screen interactions via a gender lens The book aims to bridge the gap between the disciplines of applied linguistics and cinema studies and offer linguistic insights into performed interactions from a multimodal point of view It will be equally relevant to linguists who are interested in how verbal and non verbal language is used in cinematic discourse as well as to film workers especially actors directors and screenwriters
