## **Taming Of Chance:**

*The Taming of Chance* Ian Hacking, 1990-08-31 This book combines detailed scientific historical research with characteristic philosophic breadth and verve

**Taming Chance in Education** Daniel Pettersson, Andreas Nordin, 2023-10-02 This volume centres the notion of chance in education as a key concept in contemporary education relating to aspects like accountability datafication or international large scale assessments and discusses the impact that the historical desire to tame this notion has had on present day educational policy and practice Encouraging readers to widen their educational imagination chapters combine secondary research from the fields of cybernetics systems thinking and comparative education with issues of control prediction and comparison as ways to tame chance in education Using the theoretical lenses of reasoning notions and addendums for legitimacy to foster a critical awareness of rarely discussed educational matters the book explores how these notions are central to the taming of chance within education Ultimately the authors determine the styles of reasoning that are foundational and frame how we think about and act on education and thereby address one of the top priorities in educational policy politics and practice today This timely book with its unique perspective on the debates around education will be of interest to students researchers and scholars in the fields of education policy and politics international and comparative education and theory of education Those involved with the philosophy of education will also find the book valuable

**Politics of Divination** Joshua Ramey, 2016-09-26 Since the 2008 financial crisis the neoliberal ideas that arguably caused the damage have been triumphant in presenting themselves as the only possible solution for it How can we account for the persistence of neoliberal hegemony in spite of its obviously disastrous effects upon labor capital ecology and society The argument pursued in this book is that part of the persistence of neoliberalism has to do with the archaic and obscure political theology upon which much of its discourse trades This is a political theology of chance that both underwrites and obscures sacrificial devotion to market outcomes Joshua Ramey structures this political theology around hidden homologies between modern markets as non rational randomizing meta information processors and archaic divination tools which are used in public acts of tradition bound attempts to interpret the deliverances of chance Ramey argues that only by recognizing the persistently sacred character of chance within putatively secularized discourses of risk and randomness can the investments of neoliberal power be exposed at their sacred source and an alternative political theology be constructed

**The Mystery of Reason** Paul Haffner, 2001 The Mystery of Reason investigates the enterprise of human thought searching for God People have always found stepping stones to God's existence carved in the world and in the human condition This book examines the classical proofs of God's existence and affirms their continued validity It shows that human thought can connect with God and with other aspects of religious experience Moreover it depicts how Christian faith is reasonable and is neither blind nor naked Without reason belief would degenerate into fundamentalism but without faith human thought can remain stranded on the reef of its own self sufficiency This book

proposes that the human mind must be in partnership with the human heart in any quest for God Paul Haffner is lecturer in systematic and dogmatic theology in Rome at the Pontifical Gregorian University the Pontifical Lateran University and the Pontifical Athenaeum Regina Apostolorum In this series he has published *The Mystery of Creation* *The Mystery of Mary* and *The Sacramental Mystery*     **The Meaning of Photography** Robin Kelsey, Blake Stimson, 2008 In this volume more than 20 leading scholars discuss the discipline practice historiography and study of photography from William Henry Fox Talbot to Louise Lawler and reflect on the status of photography today     Causality and Probability in the Sciences Federica Russo, Jon Williamson, 2007 Causal inference is perhaps the most important form of reasoning in the sciences A panoply of disciplines ranging from epidemiology to biology from econometrics to physics make use of probability and statistics in order to infer causal relationships However the very foundations of causal inference are up in the air it is by no means clear which methods of causal inference should be used nor why they work when they do This book brings philosophers and scientists together to tackle these important questions The papers in this volume shed light on the relationship between causality and probability and the application of these concepts within the sciences With its interdisciplinary perspective and its careful analysis *Causality and Probability in the Sciences* heralds the transition of causal inference from an art to a science

*Overland* ,2000     *Neuroscience and Education* Clarence Joldersma, 2016-03-02 This volume makes a philosophical contribution to the application of neuroscience in education It frames neuroscience research in novel ways around educational conceptualizing and practices while also taking a critical look at conceptual problems in neuroeducation and at the economic reasons driving the mind brain education movement It offers alternative approaches for situating neuroscience in educational research and practice including non reductionist models drawing from Dewey and phenomenological philosophers such as Martin Heidegger and Merleau Ponty The volume gathers together an international bevy of leading philosophers of education who are in a unique position to contribute conceptually rich and theoretically framed insight on these new developments The essays form an emerging dialogue to be used within philosophy of education as well as neuroeducation educational psychology teacher education and curriculum studies     Chance Aesthetics Meredith Malone, Susan Laxton, Janine A. Mileaf, Bradley Bailey, Emily Hage, 2009 Catalog of an exhibition held at the Mildred Lane Kemper Art Museum St Louis Sept 18 2009 Jan 4 2010     *Harper's New Monthly Magazine* ,1887     **Harper's New Monthly Magazine** Henry Mills Alden, 1875 Harper s informs a diverse body of readers of cultural business political literary and scientific affairs     **Contemporary Authors** ,1998     *Technology as Magic* Richard Stivers, 1999 At first glance technology and magic would seem to be opposites Technology is perceived to be rational scientific and efficacious whereas magic is thought to be irrational superstitious and ineffective Technology and magic while separate and distinct have taken on important characteristics of the other Publisher     **Disciplining Statistics** Libby Schweber, 2006-11-28 *Disciplining Statistics* contrasts the different ways that statistical knowledge was developed and used in England and France during the
